Global Wage Report 2020-21 -

INTERNATIONAL LABOUR OFFICE. 2020-12-02
This ILO flagship report examines the evolution of real wages around the world, giving a unique picture of wage trends globally and by region. The 2020-21 edition analyses the relationship of minimum wages and inequality, as well as the wage impacts of the COVID-19 crisis. The 2020-21 edition also reviews minimum wage systems across the world and identifies the conditions under which minimum wages can reduce inequality. The report presents comprehensive data on levels of minimum wages, their effectiveness, and the number and characteristics of workers paid at or below the minimum. The report highlights how adequate minimum wages, statutory or negotiated, can play a key role in a human-centred recovery from the crisis

Ready to Learn - Tara Beteille 2020-03-06

Countries that have sustained rapid growth over decades have typically had a strong public commitment to expanding education as well as to improving learning outcomes. South Asian countries have made considerable progress in expanding access to primary and secondary schooling, with countries having achieved near-universal enrollment of the primary-school-age cohort (ages 6+“11), except for Afghanistan and Pakistan. Secondary enrollment shows an upward trend as well. Beyond school, many more people have access to skilling opportunities and higher education today. Although governments have consistently pursued policies to expand access, a prominent feature of the region has been the role played by nonstate actors—private nonprofit and forprofit entities—in expanding access at every level of education. Though learning levels remain low, countries in the region have shown a strong commitment to

improving learning. All countries in South Asia have taken the first step, which is to assess learning outcomes regularly. Since 2010, there has been a rapid increase in the number of large-scale student learning assessments conducted in the region. But to use the findings of these assessments to improve schooling, countries must build their capacity to design assessments and analyze and use findings to inform policy.

India Positive - Chetan Bhagat 2019
In India Positive, bestselling author and columnist Chetan Bhagat brings together essays that work as a manifesto for change. Examining a gamut of subjects—from education to employment, from GST to infrastructure, from corruption to casteism—Bhagat reflects on what we can do right in order to move forward and become a truly modern, progressive country. He expresses in these pages his belief that, if we want to see reform, we—as citizens—need to be the solution. If our country is to shine, Bhagat says, we need to stand up and be 'India Positive

Citizens'. In a world ridden with negativity, these simply written, perceptive and solution-driven essays are a must-read for anyone invested in the present and future of India.

Accountability in education: meeting our commitments - UNESCO 2017-10-30

"The second edition of the Global Education Monitoring Report (GEM Report) presents the latest evidence on global progress towards the education targets of the UN Sustainable Development Goals. With hundreds of millions of people still not going to school, and many not achieving minimum skills at school, it is clear education systems are off track to achieve global goals. The marginalized currently bear the most consequences but also stand to benefit the most if policy-makers pay sufficient attention to their needs. Faced with these challenges, along with tight budgets and increased emphasis on results-oriented value for money, countries are searching for solutions. Increased accountability often tops the list. The 2017/8 GEM Report shows the entire array of approaches to

accountability in education. It ranges from countries unused to the concept, where violations of the right to education go unchallenged, to countries where accountability has become an end in itself instead of a means to inclusive, equitable and high-quality education and lifelong learning for all. The report emphasizes that education is a shared responsibility. While governments have primary responsibility, all actors - schools, teachers, parents, students, international organizations, private sector providers, civil society and the media 03 have a role in improving education systems. The report emphasized the importance of transparency and availability of information but urges caution in how data are used. It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions. In an era of multiple accountability tools, the report provides clear evidence on those that are working and those that are not."--Back cover.

Human Capital Development in South Asia - Asian Development Bank 2017-12-01

Human capital is an important factor for economic growth in South Asia. Between 1981 and 2010, human capital contributed about 22% of annual gross domestic product per worker growth in India. During the same period, it contributed around 21% in Bangladesh, and 16% in Sri Lanka. However, education and skills remain the binding constraint. Raising the quality of education and skills in South Asia's workforce can play a critical role in catching up to the level of development of the People's Republic of China, the Republic of Korea, and other successful Southeast Asian economies. This study reviews the development of human capital in South Asia and analyzes contributing factors to human development including policies and strategies that countries in South Asia follow.

Reaching the Marginalized - 2010-01-01

Children at risk of marginalization in education are found in all societies. At first glance, The lives of these children may appear poles apart. The daily experiences of slum dwellers in Kenya,

ethnic minority children in Viet Nam and a Roma child in Hungary are very different. What they have in common are missed opportunities to develop their potential, realize their hopes and build a better future through education. A decade has passed since world leaders adopted the Education for All goals. While progress has been made, millions of children are still missing out on their right to education. Reaching the marginalized identifies some of the root causes of disadvantage, both within education and beyond, and provides examples of targeted policies and practices that successfully combat exclusion. Set against the backdrop of the global economic crisis, The Report calls for a renewed financing commitment by aid donors and recipient governments alike to meet the Education for All goals by 2015. This is the eighth edition of the annual EFA Global Monitoring Report. The Report includes statistical indicators on all levels of education in more than 200 countries and territories.
