William D. Phillips, Jr

The rich cultural and political life of Spain has emerged from its complex history, from the diversity of its peoples, and from continual contact with outside influences. This book traces that history from prehistoric times to the present, focusing particularly on culture, society, politics, and personalities. Written in an engaging style, it introduces readers to the key themes that have shaped Spain's history and culture. These include its varied landscapes and climates; the impact of waves of diverse human migrations; the importance of its location

as a bridge between the Atlantic and the Mediterranean and Europe and Africa; and religion, particularly militant Catholic Christianity and its centuries of conflict with Islam and Protestantism, as well as debates over the place of the Church in modern Spain.

Illustrations, maps, and a guide to further reading, major cultural figures, and places to see, make the history of this fascinating country come alive.

Guardian Angel House - Kathy  
Clark 2009-04-01

Based on the true story of two  
sisters sheltered from the  
Nazis by a group of Catholic  
nuns during World War II.  
Mama had always told twelve-  
year-old Susan that there was  
no safe place for a Jew,  
especially in German-occupied  
Hungary in 1944. Susan is  
skeptical and afraid when she  
and her little sister, Vera, are  
sent to a convent to be kept  
"safe" from the Nazis. Susan

and Vera find their lives transformed and soon discover the true nature of courage when they are sheltered by a group of nuns who risk their lives to protect them.

"Guardian Angel House" was the nickname given to a convent operated by the Sisters of Charity in Budapest that sheltered over 120 Jewish children in German-occupied Hungary during World War II. This book tells the story of author Kathy Clark's mother and aunt, who were sheltered there by the nuns. Includes historical photographs and notes about the author's family and the Hungarian convent that became known as "Guardian Angel House."

Introduction to Geological Mapping - Rafael Ramón-Lluch 2005-01

This text tries to overcome the lack of existing literature linking theoretical concepts and practical exercises in

geological maps. This book starts from cutout plates, continues relating basic cartographic elements with topography and finishes interpreting more complicated geological maps, as a result of many years of selecting, preparing and experimenting with several map exercises. This book may be a useful resource at every level in which geological mapping is taught. By learning basic geological structures and their cartographic representation it should be possible to interpret advanced geological maps.

*Our Dogs, Ourselves*

Alexandra Horowitz

2019-09-03

From Alexandra Horowitz, #1 New York Times bestselling author of *Inside of a Dog*, an eye-opening, informative, and wholly entertaining examination and celebration of the human-canine relationship for the curious dog owner and science-lover alike. We keep dogs and are kept by them. We love dogs and (we assume) we are loved by them. We buy them sweaters, toys, shoes; we are concerned with their social lives, their food, and their health. The story of humans and dogs is thousands of years old but is far from understood. In *Our Dogs, Ourselves*, Alexandra Horowitz explores all aspects of this unique and complex interspecies pairing. As Horowitz considers the current culture of dogdom, she reveals the odd, surprising, and contradictory ways we live with dogs. We celebrate their individuality but breed them for sameness. Despite our deep emotional relationships with dogs, legally they are property to be bought, sold, abandoned, or euthanized as we wish. Even the way we speak to our dogs

is at once perplexing and delightful. In thirteen thoughtful and charming chapters, *Our Dogs, Ourselves* affirms our profound affection for this most charismatic of animals—and opens our eyes to the companions at our sides as never before.
