The Kolbrin Bible - Janice Manning 2006-05
"The Kolbrin Bible is a 2-part, 11-book secular anthology. The first six books are called the "Egyptian texts" and were penned by Egyptian academicians following the Hebrew Exodus. The last five books are called the "Celtic texts" and were penned by Celtic priests following the death of Jesus. Several accounts describe an object in orbit around our sun sun called the "Destroyer," which the Celtic authors call the "Frightener." According to recently translated Sumerian texts, this object (also known as Nibiru or Planet X) is in a 3600-year orbit around our sun, and The Kolbrin Bible warns us of its imminent return and of yet another Biblical tribulation." -- Amazon.com.

Market-based Management - Roger J. Best 2005

For MBA level Marketing Management and/or Marketing Strategy courses, or a capstone undergraduate marketing course. Strategic, applied, and performance-oriented. While most textbooks in this area stress concepts and theory, Market-Based Management, 4e, incorporates a more strategic and applied approach. External performance metrics of a business are emphasized and actual measurement tools are provided. Its streamlined organization makes it ideal for courses in which outside cases and readings will be assigned.

Formations of the Secular - Talal Asad

2003-02-03

Opening with the provocative query “what might an anthropology of the secular look like?” this book explores the concepts, practices, and political formations of secularism, with emphasis on the major historical shifts that have shaped secular sensibilities and attitudes in the modern West and the Middle East. Talal Asad proceeds to dismantle commonly held assumptions about the secular and the terrain it allegedly covers. He argues that while anthropologists have oriented themselves to the study of the “strangeness of the non-European world” and to what are seen as non-rational dimensions of social life (things like myth, taboo, and religion), the modern and the secular have not been adequately examined. The conclusion is that the secular cannot be viewed as a successor to religion, or be seen as on the side of the rational. It is a category with a multi-layered history, related to major premises of modernity, democracy, and the concept of human rights. This book will appeal to anthropologists, historians, religious studies scholars, as well as scholars working on modernity.

The Sales Bible - Jeffrey Gitomer 2003

Issues in 21st Century World Politics Mark Beeson 2017-03-04

The third edition of this popular textbook offers a comprehensive and authoritative introduction to the key questions that will confront anyone interested in world politics for decades to come. This text is a collation of topical chapters, each authored by experts in their own field and written in a clear and balanced manner. The issues which endure, as well as new and unexpected issues, are all covered within this text, with cross-referencing between chapters

and to external work. New chapters cover the major developments of this era, including the impact of the financial crisis, climate change, the refugee crisis, the rise of China and Russia. Beeson and Bisely hone this text with their careful editorship. They place this text within the context of the key questions that arise from these issues: to what extent can policy makers cope with fundamental changes to politics, what will the impact of non-state actors be, what can we predict about future world politics, to name a few. This makes the text indispensable to students wishing to understand contemporary world politics. Being wide-ranging and completely up-to-date, this is the ideal companion for both undergraduates and postgraduate students of international relations and politics. The text has been written in a clear and approachable manner to make it accessible to students unfamiliar with the topic.

Classics of Organizational Behavior - Walter E. Natemeyer 2011

Digital Integrated Circuits - Thomas A. DeMassa 1996

Contains the most extensive coverage of digital integrated circuits available in a single source. Provides complete qualitative descriptions of circuit operation followed by in-depth analytical analyses and spice simulations. The circuit families described in detail are transistor-transistor logic (TTL, STTL, and ASTTL), emitter-coupled logic (ECL), NMOS logic, CMOS logic, dynamic CMOS, BiCMOS structures and various MOSFET technologies. In addition to detailed presentation of the basic inverter circuits for each digital logic family, complete details of other logic circuits for these families are presented.
