Chevrolet S-10 & GMC Sonoma Pick-ups - Max Haynes 2008-08-01
Haynes manuals are written specifically for the do-it-yourselfer, yet are complete enough to be used by professional mechanics. Since 1960 Haynes has produced manuals written from hands-on experience based on a vehicle teardown with hundreds of photos and illustrations, making Haynes the world leader in automotive repair information. Covers Chevy S-10 and GMC Sonoma pickups (1994-2004), Blazer and Jimmy (1995-2004), GMC Envoy (1998-2001), and Oldsmobile Bravada & Isuzu Hombre (1996-2001).

Intelligent Projects Using Python - Santanu Pattanayak 2019-01-31
Implement machine learning and deep learning methodologies to build smart, cognitive AI projects using Python Key FeaturesA go-to guide to help you master AI algorithms and concepts8 real-world projects tackling different challenges in healthcare, e-commerce, and surveillanceUse

TensorFlow, Keras, and other Python libraries to implement smart AI applicationsBook Description This book will be a perfect companion if you want to build insightful projects from leading AI domains using Python. The book covers detailed implementation of projects from all the core disciplines of AI. We start by covering the basics of how to create smart systems using machine learning and deep learning techniques. You will assimilate various neural network architectures such as CNN, RNN, LSTM, to solve critical new world challenges. You will learn to train a model to detect diabetic retinopathy conditions in the human eye and create an intelligent system for performing a video-to-text translation. You will use the transfer learning technique in the healthcare domain and implement style transfer using GANs. Later you will learn to build AI-based recommendation systems, a mobile app for sentiment analysis and a powerful chatbot for carrying customer services. You will implement AI techniques in the cybersecurity domain to generate Captchas. Later you will train and build autonomous vehicles to self-drive using reinforcement learning. You will be using libraries from the Python ecosystem such as TensorFlow, Keras and more to bring the core aspects of machine learning, deep learning, and AI. By the end of this book, you will be skilled to build your own smart models for tackling any kind of AI problems without any hassle. What you will learnBuild an intelligent machine translation system using seq-2-seq neural translation

machinesCreate AI applications using GAN and deploy smart mobile apps using TensorFlowTranslate videos into text using CNN and RNNImplement smart AI Chatbots, and integrate and extend them in several domainsCreate smart reinforcement, learning-based applications using Q-LearningBreak and generate CAPTCHA using Deep Learning and Adversarial Learning Who this book is for This book is intended for data scientists, machine learning professionals, and deep learning practitioners who are ready to extend their knowledge and potential in AI. If you want to build real-life smart systems to play a crucial role in every complex domain, then this book is what you need. Knowledge of Python programming and a familiarity with basic machine learning and deep learning concepts are expected to help you get the most out of the book

News of the Weird Chuck Shepherd 1989
For news junkies and fans of the bizarre-but-true, here is an outrageous collection of all-real, all-weird news stories culled from the nation's mainstream newspapers. Line art throughout.

Unbeatable BMW - Jeremy Walton 1998
Unbeatable BMW is the comprehensive history of BMW competition from 1917 through 1997. The first edition of Unbeatable BMW became a cult classic among enthusiasts, but its coverage was restricted to the years 1959-79. Now, this astounding story has been massively expanded by the author in a hardcover format, richly illustrated in full color. Jeremy Walton weaves together the tale of BMW's engineering know-how, daredevil drivers, inimitable team leaders, and the cars they championed and drove to the winner's circle. Behind BMW's envied reputation and the whirling-propeller badge are such legends as the prewar BMW 328 sports cars and the 1990s 200 m.p.h. McLaren/BMW V12s. Unbeatable BMW also gives first-hand tales of BMW's aviation and motorcycling deeds. Included are gripping accounts of the preparation and track-side action for such emotive winners as the diminutive BMW 700 coupes to the 1800 "Tisa" and 2002s. Walton sweeps through the 1970s "Batmobile" 3.0 CSL lightweight racing coupes, then explores the best-selling 3-series in every race category. Walton also covers the

unexpected success of the 5- and 6-series, the latter against Jaguar. Unbeatable BMW recalls the establishment of BMW's Motorsport division, and the thrill of the first M-Powered cars. From M1 onward, the author details the burgeoning M-brand, how MPower won the first world title for a turbocharged car (1983), and the years as the backbone of European Formula 2. The book's 582 pages are packed with detail to thrill the heart of the most ardent BMW fan, from meticulous photo captions listing car, driver, and race date, to six appendices covering the competition cars since 1960, drivers' accomplishments, and powerplant specifications. In short, if BMW has raced, rallied, or flown their products in competition, Unbeatable BMW gives the full, behind-the-scenes story in this compelling account of the marque's motorsports history.

Spencer Bower - Piers Feltham 2017-02-22
Spencer Bower: Reliance-Based Estoppel, previously titled Estoppel by Representation, is the highly regarded and long established textbook on the doctrines of reliance-based estoppel, by which a party is prevented from changing his position if he has induced another to rely on it such that the other will suffer by that change. Since the fourth edition in 2003 the House of Lords has decided two proprietary estoppel cases, Cobbe v Yeoman's Row Property Management Ltd and Thorner v Major, whose combined effect is identified as helping to define a criterion for a reliance-based estoppel founded on a representation, namely that the party estopped actually intends the estoppel raiser to act in reliance on the representation, or is reasonably understood to intend him so to act. Other developments in the doctrine of proprietary estoppel have required a complete revision of the related chapter, Chapter 12, in this edition.Thorner v Major confirms too the submission in the fourth edition that unequivocality is a requirement for any reliance-based estoppel founded on a representation. Other views expressed in the fourth edition are also noted to have been upheld, such as the recognition that an estoppel may be founded on a representation of law (Briggs v Gleeds), that a party may preclude itself from denying a proposition by contract as well as another's reliance (Peekay Intermark Ltd v Australia and New Zealand Banking Group Ltd and Springwell Navigation Corp v JP Morgan Chase Bank) and that an estoppel by deed binds by agreement or declaration under seal rather than by reason of reliance (Prime Sight Ltd v Lavarello). With the adjustment reflected in the change of title, and distinguishing the foundation of estoppels that bind by deed and by contract, the editors adopt Spencer Bower's unificatory project by the identification of the reliance-based estoppels as aspects of a single principle preventing a change of position that would be unfair by reason of responsibility for prejudicial reliance. From this follow the views: that reliance-based estoppels have common requirements of responsibility, causation and prejudice; that estoppel by representation of fact is, like the other reliance-based estoppels, a rule of law; that the result of estoppel by representation of fact may, accordingly, be mitigated on equitable grounds to avoid injustice; that the result of an estoppel by convention depends on whether its subject matter is factual, promissory or proprietary; that a reliance-based estoppel (other than a proprietary estoppel, which uniquely generates a cause of action) may be deployed to complete a cause of action where, absent the estoppel, a cause of action would not lie, unless it would unacceptably subvert a rule of law (in particular the doctrine of consideration); that an estoppel as to a right in or over property generates a discretionary remedy; and that the prohibition on the deployment of a promissory estoppel as a sword should be understood as an application of the defence of illegality, viz that an estoppel may not unacceptably subvert a statute or rule of law.

Mr Big Healey - Norman Burr 2010-07-15

This is the authorized biography of one of the best-liked bad boys in British motorsport. John Chatham, driver, racer, repairer, rebuilder, tuner, trader and lover of Austin-Healeys, was in the words of Geoffrey Healey "uncontrollable" in his youth, and has only mildly mellowed with age. Burly and genial but formidably competitive, and not above bending the rules when he thought he could get away with it, to many he is the archetypal club racer. John is so synonymous with Austin-Healeys that the most famous racing Healey in the world, DD300, is so well-known mainly because John campaigned it for decades, notching up tens of thousands of racing miles. But his career embraces far more than one car, and until this biography no-one had attempted to fill in the gaps. The book is not a dry description of one club race after another. It does include a list of John's principal sporting achievements, but no complete record exists of the hundreds of events which made up his competitive career, so the writer has not attempted to compile one. Instead Norman Burr, who was himself acquainted with John in his youth, has created a more rounded and personal account, full of motoring and sporting anecdotes, but also telling the story of John's family, his work, his business, his three wives and his lovers. John has a comprehensive photo library from which the book is generously illustrated, with cartoons added to illustrate some of the moments that a camera was not around to record. Thoroughly politically incorrect even by the standards of the 1960s, it's an account which will strike a chord not only with admirers of Big Healeys, but also with anyone who believes that independent thinking, and the courage to apply and enjoy it, is the greatest virtue of all.
