You Suck at Racing - Ian Korf 2016-05-12

A lot of books on driving are written by professional racers who assume you too want to be a professional racer. Not this book. It's written by a hobbyist who suggests you keep your day job. Besides, it's much more fun being an enthusiastic amateur than a jaded professional (just ask someone in the sex industry). This book is designed to help the average driver make the transition from commuter to safe road racer in as few pages as possible. I wrote this book because it's what I would have wanted to read when I first became interested in track driving: succinct, nerdy, practical, and occasionally diverting. It is not intended as a definitive tome or a work of art. It's more like a sandwich: convenient and nourishing.

Infinite Jest - David Foster Wallace 2009-04-13

A gargantuan, mind-altering comedy about the Pursuit of Happiness in America Set in an addicts' halfway house and a tennis academy, and featuring the most endearingly screwed-up family to come along in recent fiction, Infinite Jest explores essential questions about what entertainment is and why it has come to so dominate our lives; about how our desire for entertainment affects our need to connect with other people; and about what the pleasures we choose say about who we are. Equal parts philosophical quest and screwball comedy, Infinite Jest bends every rule of fiction without sacrificing for a moment its own entertainment value. It is an exuberant, uniquely American exploration of

the passions that make us human - and one of those rare books that renew the idea of what a novel can do. "The next step in fiction...Edgy, accurate, and darkly witty...Think Beckett, think Pynchon, think Gaddis. Think." --Sven Birkerts, *The Atlantic*

Architects of American Air Supremacy - Dik A. Daso 2002-04-01

The United States Air Force is the most technologically advanced service in the world. Stealth, precision, global range, and space systems are only a few of the hallmarks of the USAF technology. Airborne laser weapons, super-accurate sensors, and hypersonic aircraft are already in the early stages of development. Creations such as these are not the product of stagnant minds or idle hands. It was in 1944 that General of the Army Henry H. "Hap" Arnold established the Army Air Forces (AAF) Scientific Advisory Group (SAG) under the direction of Dr. Theodore von Karman. The SAG meticulously created the first science and technology forecast ever accomplished in military history. The study predicted many of the developments in aviation technology which, today, most Americans take for granted. Some of the more outstanding of these are supersonic flight, precision weaponry, accurate radar, and the development of intercontinental ballistic missiles (ICBM). In *Architects of American Air Supremacy*, Dik Daso tells the story of the founding of the scientific and technical base of today's USAF. But this work is much more than simply a history of technology. The SAG was a culminating point reached only after many years of building interpersonal relationships, developing industrial bonds, and tapping the wisdom of America's most influential scientists. In large measure this book reflects the symbiotic nature of the military and the society which it serves. This book is an introduction to the very nature of the USAF - a service founded in aviation science and technology and built by great commanders, innovators, and dedicated men and women in the service of their nation. Buyology - Martin Lindstrom 2010-02-02

NEW YORK TIMES BESTSELLER • "A fascinating look at how consumers perceive logos, ads, commercials, brands, and products."—Time How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In *Buyology*, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can "cool" brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? *Buyology* is a fascinating and shocking journey into the mind of today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.

Adoption and Law Lisamarie Deblasio 2020-07-24

Using a socio-legal framework, this book explores the experiences that

birth mothers face in state sanctioned adoption proceedings in the UK. Featuring personal, in-depth interviews and conversations with 32 birth mothers, the book highlights perspectives and voices that are seldom the focus in leading discourses of professional practice in this area of law. The book also demands that the statutory rights, support and care of birth mothers are recognised and strengthened. This book delivers a comprehensive insight into many aspects and controversies of legal child adoption, including the development and reform of adoption law over history, giving the reader insight into the deep-rooted political and social tensions around the use of adoption. The uniqueness of birth mothers' subjective stories of adoption contrasts powerfully with the legal theory providing the reader with an intimate paradigm of adoption. The book includes discussion of obiter dicta and authoritative guidance on adoption practice from the Supreme Court and Court of Appeal in *Re B (A Child) (Care Proceedings: Appeal)* [2013] UKSC 33 and *Re B-S (Children) (Adoption: Leave to Oppose)* [2013] EWCA Civ 1146. It also considers Court of Appeal's recent ruling on post adoption contact in *Re B (A Child) (Post-Adoption Contact)* [2019] EWCA Civ 29, the first case to come before the court since section 9 of the Children and Families Act 2014 amended the Adoption and Children Act 2002, with the new insertion of section 51A and 51B providing for court ordered post adoption contact. This book is ideally suited to undergraduate students, as well as a more multi-disciplinary audience.

Just Needs a Recharge Rob Siegel 2018-04-24

Air conditioning in vintage cars often falls into disrepair, as owners figure that it never really worked all that well when it was new, and assume that rejuvenation would be prohibitively expensive. In his new book, *Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning*, Rob Siegel details exactly what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting refrigerant so that the a/c blows cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW 2002 and 3.0CS), and concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or orifice tube, the condenser and fan, the receiver/drier or accumulator, electrical connections and compressor cycling, connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-scratch a/c retrofit, making and installing hoses, flushing the system, pressure-testing and leak detection, evacuating and charging the system troubleshooting, and other things that heat up the cabin.
