Automotive Mechatronics: Operational and Practical Issues - B. T. Fijalkowski 2010-11-25

This book presents operational and practical issues of automotive mechatronics with special emphasis on the heterogeneous automotive vehicle systems approach, and is intended as a graduate text as well as a reference for scientists and engineers involved in the design of automotive mechatronic control systems. As the complexity of automotive vehicles increases, so does the dearth of high competence, multi-disciplined automotive scientists and engineers. This book provides a discussion into the type of mechatronic control systems found in modern vehicles and the skills required by automotive scientists and engineers working in this environment. Divided into two volumes and five parts, Automotive Mechatronics aims at improving automotive mechatronics education and emphasises the training of students' experimental hands-on abilities, stimulating and promoting experience among high education institutes and produce more automotive mechatronics and automation engineers. The main subject that are treated are: VOLUME I: RBW or XBW unibody or chassis-motion mechatronic control hypersystems; DBW AWD propulsion mechatronic control systems; BBW AWB dispulsion mechatronic control systems; VOLUME II: SBW AWS diversion mechatronic control systems; ABW AWA suspension mechatronic control systems. This volume was developed for undergraduate and postgraduate students as well as for professionals involved in all disciplines related to the design or research and development of automotive vehicle dynamics, powertrains, brakes, steering, and shock absorbers (dampers). Basic knowledge of college mathematics, college physics, and knowledge of the functionality of automotive vehicle basic propulsion, dispulsion, conversion and suspension systems is required.

Lithium-Ion Batteries: Basics and Applications - Reiner Korthauer 2018-08-07

The handbook focuses on a complete outline of lithium-ion batteries. Just before starting with an exposition of the fundamentals of this system, the book gives a short explanation of the newest cell generation. The most important elements are described as negative / positive electrode materials, electrolytes, seals and separators. The battery disconnect unit and the battery management system are important parts of modern lithium-ion batteries. An economical, faultless and efficient battery production is a must today and is represented with one chapter in the handbook. Cross-cutting issues like electrical, chemical, functional safety are further topics. Last but not least standards and transportation themes are the final chapters of the handbook. The different topics of the handbook provide a good knowledge base not only for those working daily on electrochemical energy storage, but also to scientists, engineers and students concerned in modern battery systems.

Mustang Boss 302 - Donald Farr 2011-08-29

Of the legendary names in the history of the Ford Mustang, one stands apart: Boss. Originally created to homologate the new Boss 302 engine for SCCA Trans-Am racing, the Boss 302 Mustang was built in limited numbers for the street. Designed by legend Larry Shinoda, the Boss cars were easily distinguished from their less potent stable mates by their unique front and rear spoilers, rear window slats, and the omission of the standard Mustang's (fake) rear fender brake ducts. Also standard was a shaker hood scoop and bold graphics. Though Mustang performance faded to all-time lows as the 1970s rolled on, there was good news on the way. The pairing of the venerable 302 Windsor engine with the new Fox-body platform for the 1979 Mustang might not have seemed significant at the time, but it was the first edition of what would become a performance institution in the late 20th century: the 5-liter Mustang was an overwhelming force on the streets and tracks through the end of its production in 1995. With no small amount of fanfare, Ford is paying homage to its performance past with the re-introduction of the 5.0 liter powerplant in the Mustang GT for 2011.

Lemon-Aid Used Cars and Trucks 2010-2011 - Phil Edmonston 2010-05-11

Phil describes sales and service scams, lists which vehicles are factory goofs, and sets out the prices you should pay. As Canada's automotive "Dr. Phil" for over 40 years, Edmonston pulls no punches. His Lemon-Aid is more potent and provocative than ever.

12 Big Lies and the Prairies of Heaven Brauer 2012-11-05
Brauer leaves no stone unturned, no metaphor untold, and no holds barred in this witty deconstruction of the modern economy. With up to the minute inserts and reflections, Twelve Big Lies and the Prairies of Heaven unravels a contemporary canvas of economics today, exploring and demystifying the causalities, and the influence of those responsible. Brauer's idiosyncratic style, from his Quaker roots and Buddhist principles, lends a piquancy to his curious stance with phrases like "Seeking to understand wu-wei, the art of participating without interfering, might go a long way to re-orienting the bizarre farrago that democracy has become." Whether getting ruffled with the Media having 'all the percipience and principle of a lobotomised Caliban', or lumping bankers in with politicians in the 'conspiracy of charlatans', Brauer weighs his arguments to form a trustworthy voice intent on showing, rather than telling. With edicts for everyone from Confucious to archy the cockroach, Brauer communicates with palatable, pub-table anecdotes and examples, home-grown diagrams and illustrations, and fair, honest questions in this timely study of human beings in the face of power and money.

Lemon-Aid New Cars and Trucks 2011 - Phil Edmonston 2010-11-11

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz - rich cars, poor quality. There's only one Saturn you should buy. Toyota - enough apologies: "when you mess up, 'fess up."

Learning Rates of Electric Vehicles - Andreas Zerfaß 2017-11-01

Governments of many countries consider the electrification of individual passenger transport as a suitable strategy to decrease oil dependency and reduce transport-related carbon dioxide (CO₂) and air pollutant emissions. However, battery-electric vehicles (BEVs) and plug-in hybrid-electric vehicles (PHEVs) have been more expensive than their conventional counterparts and suffer from relatively short electric driving ranges, which still hampers the market potential of these vehicles. Despite persisting shortfalls, mechanisms such as technological learning and economics of scale promise to improve the techno-economic performance of BEVs and PHEVs in the short- to mid-term. Here, the author seeks to obtain insight into the techno-economic prospects of BEVs and PHEVs by: (i) establishing experience curves and (ii)

quantifying user costs and the costs of mitigating carbon dioxide and air pollutant emissions in a time-series analysis. The analysis captures the situation in Germany between 2010 and 2016.

Il business automotivo - Vito Caramia 2012-06-01T01:00:00+02:00

Mai come nell'ultimo periodo il mercato delle quattro e delle due ruote è stato tanto in fermento da determinare una vera e propria metamorfosi delle reti distributive. Calo vertiginoso della domanda, inasprimento della concorrenza, aumento degli standard quantitativi e qualitativi richiesti dalle Case produttrici, maggiore ricorso a fonti di finanziamento esterne, diminuzione della redditività, sono solo alcuni dei tanti nuovi mostri sperimentati da chi vende e ripara auto e moto. Questa evoluzione rende necessaria la conoscenza di tecniche di gestione tipiche di un settore in cui la passione non può più pilotare il destino delle aziende. Questo primo manuale di Dealership Management italiano, dedicato al settore automotive, spiega a fondo tutti gli aspetti del mercato e dell'organizzazione aziendale. Attraverso esempi concreti e dalla viva voce dei top manager delle più importanti Case italiane di auto e moto, offre importanti soluzioni a molti dei problemi emersi negli ultimi anni e le mosse per anticipare la ripresa. La prefazione del libro è un'intervista a Giuseppe Volpato (professore ordinario di Economia e gestione delle imprese presso l'Università Ca' Foscari di Venezia, membro dello Steering Committee del Groupe d'Étude et Recherche Permanent dans l'Industrie et les Salariés de l'Automobile di Parigi e Senior Adviser dell'International Car Distribution Programme di Birmingham), che ci aiuta a decifrare con rigore scientifico l'evoluzione in atto nel business model della distribuzione automotive.

for over sixty years. They would enjoy love, laughter and bitter disappointment. They would also produce four sons who would bear witness to their fiery love hate relationship. After their passing in the year 2012, their four sons, along with their wives, would all gather one year later to celebrate their parent's lives and hash out old and new wounds that had haunted all four Peyton brothers for many years. The Ultimate Weapon is No Weapon - Shannon D. Beebe 2010-05-11

The twenty-first century has seen millions unemployed. It has seen livelihoods undermined by environmental degradation. Middle-class cities in Europe, Asia, and Africa have become cauldrons of violence and resentment. Tribalism, ethnic nationalism, and religious fundamentalism have flared dangerously, from Russia to Spain. The use of force is unlikely to help. What works when counter-insurgency has run its course: in Iraq, Afghanistan, Pakistan, and beyond? In this book, two authors brought together from distant points on the political spectrum by their concerns about the repercussions of violent political conflict on human lives, explain and explore a new idea for stabilizing the dangerous neighborhoods of the world. They challenge head-on Condoleezza Rice's declaration that "it is not the job of the 82nd Airborne Division to escort kids to kindergarten" contending that, in fact, it should be. When marginalized populations are trapped in poverty and lawlessness and denied political power and justice brutality, and fascism thrive. Human security is a new concept for clarifying what peace requires and the policies and priorities by which to achieve it.
