Fatal Accident Reporting System -

The Critical Path - Brock Yates 1996-08-12

The story of how Chrysler's minivan team created an automobile that captured the 1995 Motor Trend Car of the Year and other major awards - and reinvented a perilously entrenched corporation in the process - is as dramatic and inspiring a story as any in business today. Brock Yates, one of the most respected writers in the auto world, was given unprecedented access to Chrysler - every planning session, presentation, budget review, test drive, assembly line start-up, and marketing launch. The result is a book that unveils the mysteries of modern car-making, revealing how cars are shaped through countless interlinked decisions ranging from size and power to door configurations, color selections, and innumerable other interconnected details. It also captures the complex process by which the thousands of separate pieces that make up a car are designed, tested, manufactured, and marshaled into place at the exact moment they are needed. For any reader who cares about cars, this is the most intriguing look inside the

mysteries of their creation ever written. At the same time, The Critical Path recounts an extraordinary drama of all-too-human managers attempting to make something new, in a new way, inside a corporate culture that resists them at every turn. The story of how Chrysler's minivan platform team kept their commitment to quality, schedule, and budget - with a \$3 billion investment and the company's fate palpably in the balance - is as encouraging a tale as has emerged from American business in years. The unprecedented triumph and Chrysler's resultant comeback is a lesson in successful management that will be savored by any reader interested in how great companies make breakthroughproducts.

SafeFITS - Safe Future Inland Transport Systems - Department of Economic and Social Affairs 2019-05-20

This report presents the results of the project Safe Future Inland Transport Systems (SafeFITS), which aims to develop a robust road safety decision-making tool to support the most appropriate road safety policies and measures to achieve tangible results. Road accidents constitute a major social problem in modern societies, accounting for more than 1 million accidents per year in EU-28 (2,900 per day), resulting in 1.4 million injuries and 26,000 fatalities. Current trends suggest that, unless action is taken, traffic injuries will become the fifth leading cause of death by 2030, with the disparity between high-income and low-income countries further increased.
