Introduction to Critical Care Nursing - Mary Lou Sole 2005

The 4th edition provides a solid foundation in the concepts, assessment, and technical skills of critical care nursing. It includes an entire section focusing on skills that every critical care nurse needs to use, such as ventilatory assistance and hemodynamic monitoring. The text also provides real-life case studies to help readers understand how concepts apply to critical care practice. New chapters on the hot areas of Nutrition and Comfort and Sedation reflect the real-world challenges of the critical care nurse. Introduction to Critical Care Nursing, 4th Edition also comes with a companion website with self-study exercises. Ideal for students as well as experienced nurses new to critical care. Instructor resources available; contact your sales representative for details. Clinical Alerts emphasize the procedures and issues encountered in the clinical setting. Laboratory Alerts detail both common and cutting-edge tests and procedures. Research Analysis with references incorporate studies on cultural diversity and complementary therapies. Nursing Care Plans provide examples of nursing care for specific disorders; they include nursing diagnoses, patient outcomes, nursing interventions, and rationales. Case Studies present actual cases highlighting the major discussions in each chapter with accompanying questions to help readers better understand how concepts apply to real life. Pathophysiology Flow Charts provide outcomes of particular injuries, disorders, and complex diseases. Geriatric Assessments alert the reader to the special critical care needs of the older patient. Drug Tables reflect the most current and most commonly used critical care drugs. Critical Thinking Questions challenge students' comprehension of the content. 2 NEW chapters on Nutritional Support and Comfort and Sedation cover hot topics in critical care nursing today. NEW! Two-color design and 85 new two-color line drawings enhance reader understanding. NEW! Evolve companion website supplements the text with numerous resources for instructors and learning tools for students, such as open-book quizzes for self-study and review. A NEW column of Rationales is included in Nursing Care Plans. Expansion of Gerontology content throughout the text increases the focus on this special population.

Strategies to Improve Cardiac Arrest Survival - Institute of Medicine 2015-09-29

Cardiac arrest can strike a seemingly healthy individual of any age, race, ethnicity, or gender at any time in

any location, often without warning. Cardiac arrest is the third leading cause of death in the United States, following cancer and heart disease. Four out of five cardiac arrests occur in the home, and more than 90 percent of individuals with cardiac arrest die before reaching the hospital. First and foremost, cardiac arrest treatment is a community issue - local resources and personnel must provide appropriate, high-quality care to save the life of a community member. Time between onset of arrest and provision of care is fundamental, and shortening this time is one of the best ways to reduce the risk of death and disability from cardiac arrest. Specific actions can be implemented now to decrease this time, and recent advances in science could lead to new discoveries in the causes of, and treatments for, cardiac arrest. However, specific barriers must first be addressed. Strategies to Improve Cardiac Arrest Survival examines the complete system of response to cardiac arrest in the United States and identifies opportunities within existing and new treatments, strategies, and research that promise to improve the survival and recovery of patients. The recommendations of Strategies to Improve Cardiac Arrest Survival provide high-priority actions to advance the field as a whole. This report will help citizens, government agencies, and private industry to improve health outcomes from sudden cardiac arrest across the United States.

American Red Cross Basic Life Support Participant's Manual - American Red Cross 2018-01-11

Foundations of Education: An EMS Approach - National Association of EMS Educators (NAEMSE) 2019-07-15

The evolving field of emergency medical services (EMS) requires professional educators who are knowledgeable about teaching and learning strategies, classroom management, assessment and evaluation, technology in learning, legal implications in education, program infrastructure design, and administering programs of excellence to meet state and national accreditation guidelines. Foundations of Education: An EMS Approach, Third Edition, provides EMS educators with the tools, ideas, and information necessary to succeed in each of these areas. The content reflects how current educational knowledge and theory uniquely apply to EMS students, educators, and programs. This textbook is used in the NAEMSE Instructor Courses, and is an excellent reference for all EMS educators, as well as educators in allied health professions. Evidence-Based Content In addition to foundational topics such as teaching philosophy and classroom management, the text covers brain-based learning, accreditation and program evaluation, emerging technologies, and assessment strategies. It guides educators to write objectives, prepare lesson plans, and deliver education in engaging ways to maximize student learning. Grounded in this information, EMS educators can promote effective education regardless of the type of course or setting. Highlights - Covers current educational theory and teaching methodologies specific to EMS -Meets and exceeds the latest DOT National Guidelines for Educating EMS Instructors -Offer practical advice and scenarios in the form of Teaching Tips and Case in Points

Geriatric Education for Emergency Medical Services (Gems) - David R. Snyder 2014-10-17

Now published in partnership with the National Association of EMTs, the Second Edition of this national continuing education curriculum is the most credible and complete source of prehospital medical information for the older population. Geriatric Education for Emergency Medical Services (GEMS), Second Edition builds off the previous edition and includes expanded content that will cover new areas addressed

in the National EMS Education Standards, including mobile integrated healthcare and disasters. The GEMS course is an innovative, comprehensive, and highly interactive 1-day course for both BLS and ALS providers with: *Online Precourse Modules* Case-based lectures *Live action video* Hands-on skill stations *Small group scenarios New to the Second Edition: A 2-day ALS course option is also available, featuring 8 hours of interactive online modules. The online courseware provides more advanced, in-depth content for ALS providers and explores the role of mobile integrated healthcare in improving the quality of life for older patients.

NICHE - Terry T. Fulmer 2019

The NICHE model demonstrates improved clinical outcomes, positive fiscal results, enhanced nursing competencies, community recognition, and greater patient, family, and staff satisfaction. This official guidebook to the NICHE model of care provides nurses with the knowledge and skills for delivering best practice in the care of older adults. Primarily hospital-based, NICHE currently has a network of over 600 national and international healthcare organizations. The NICHE model ensures that every adult age 65 and over receives care that promotes dignity, autonomy and function. Written by world-leading experts in gerontological nursing, this distinguished publication serves as the gold standard manual for nurses and all clinical care providers looking to provide optimal, evidence-based care to their older patients. As the leading nurse-driven program designed to address the complex needs of older adults, the NICHE model emphasizes the role of the nurse as a change agent and leader for effective program development, implementation of best practices, and formulation of healthcare policy. This model engages frontline practicing nurses and staff, providing the requisite knowledge and skills to work autonomously with full responsibility and authority in complex healthcare systems. Key Features Reflects the best practices of the over 600 NICHE hospitals Features multiple case studies and exemplars Uses an interprofessional approach to care Draws on leading gerontological nursing experts nationally and internationally Highly relevant to a global audience This publication also serves as the policy, planning and implementation companion to Evidence-Based Geriatric Nursing Protocols for Best Practice, edited by Marie Boltz, PhD, RN, GNP-BC, FGSA, FFAN et al

CPR/AED for the Professional Rescuer - American Red Cross 2006

This New American Red Cross CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.

2021 Illinois AMP Real Estate Exam Prep Questions & Answers - Real Estate Exam Professionals Ltd. 2020-12-21

Pass the 2021 Illinois AMP Real Estate Salesperson Exam effortlessly on your 1st try. Sheehy's Emergency Nursing - E-Book Emergency Nurses Association 2009-06-30

Written by emergency nurses for emergency nurses, this comprehensive, evidence-based resource covers the issues and procedures that are often unique to the emergency department. New developments and changes in clinical practice are incorporated throughout. The user-friendly format features more than 350 high-quality illustrations and 150 tables that highlight essential concepts and offer quick access to vital information. Key coverage includes clinical fundamentals, treatment for trauma and medical-surgical emergencies, the foundations of emergency nursing practice, and special populations. 58 contributors offer valuable insights from a broad range of clinical positions in rural, suburban, and urban areas. High-quality radiographs and other diagnostic images help you learn to identify common conditions — especially head trauma, fractures, and dislocations. Logically organized, chapters are grouped into six sections for quick access to important content: Foundations of Emergency Nursing, Professional Practice, Clinical Foundations of Emergency Nursing, Major Trauma Emergencies, Medical and Surgical Emergencies, and Special Patient Populations. Tables and boxes highlight and summarize critical information for at-a-glance reference. A separate unit on special patient populations covers topics such as child abuse, elder abuse, intimate partner violence, sexual assault, substance abuse and behavioral/pediatric/obstetrical emergencies. Priority nursing diagnoses are highlighted in a quick-reference appendix to help you focus on the most serious problems. Five new chapters bring you the most reliable, up-to-date information on these key topics: Management of the Critical Care Patient in the Emergency Department Family Presence During Resuscitation Forensic Nursing Nuclear, Biological, and Chemical Agents of Mass Destruction Influenza: Seasonal, Avian, and Pandemic Expanded coverage of shock and sepsis provides essential information on pathophysiology and diagnosis, with valuable guidelines for managing these patients. A detailed discussion of various types of triage systems and triage acuity ratings examines valid and reliable methods for differentiating between patients who require immediate treatment and those who can wait. Additional coverage of behavioral health emergencies includes new information on agitation, substance abuse, and suicide prevention.

Heartsaver Pediatric First Aid - American Heart Association 2006-01-01

The student workbook for the credentialed Heartsaver Pediatric First Aid course. Provides information on how to manage illness and injuries in a child during the first few minutes of an emergency until professional help arrives. Includes four core modules: First Aid Basics, Injuries and Illnesses, Life-Threatening Emergencies and the Chain of Survival, and CPR and AED. Also includes optional modules, such as Use of a Nebulizer, to meet regulations for day-care centers in certain states. Workbook comes shrink-wrapped with the Heartsaver Pediatric First Aid Quick Reference Guide (#80-1002), the Adult CPR And AED Reminder Card, the Child And Infant CPR And AED Reminder Card, and a CD containing supplemental information and video clips on CPR and AED skills. An ideal resource for first responders, child-care workers, teachers, foster-care workers, camp counselors, youth organizations, coaches/Little League organizations, as well as parents, grandparents, and baby sitters.
