*Adversari al Desi gn* Carl DiSalvo 2012-04-13

An exploration of the political qualities of technology design, as seen in projects that span art, computer science, and consumer products. In *Adversarial Design*, Carl DiSalvo examines the ways that technology design can provoke and engage the political. He describes a practice, which he terms “adversarial design,” that uses the means and forms of design to challenge beliefs, values, and what is taken to be fact. It is not simply applying design to politics—attempting to improve governance for example, by redesigning ballots and polling

places; it is implicitly contestational and strives to question conventional approaches to political issues. DiSalvo explores the political qualities and potentials of design by examining a series of projects that span design and art, engineering and computer science, agitprop and consumer products. He views these projects—which include computational visualizations of networks of power and influence, therapy robots that shape sociability, and everyday objects embedded with microchips that enable users to circumvent surveillance—through the lens of agonism, a political theory that emphasizes contention as foundational to democracy.

DiSalvo's illuminating analysis aims to provide design criticism with a new approach for thinking about the relationship between forms of political expression, computation as a medium, and the processes and products of design.

**The Language of Things: Understanding the World of Desirable Objects** - Deyan Sudjic 2009-06-01

A brilliant exposé of the interaction between art, design, and commerce. In *The Language of Things*, the director of London's Design Museum charts our relationship with all things designed. With scintillating wit and an eye for the pleasures and dangers of rampant consumerism, Deyan Sudjic takes us from luxury car commercials to glossy advertisements for seasonal variations of the Prada purse to the hype surrounding the latest version of the iPhone, exploring how we are manipulated and seduced by our possessions. Who would've thought that it's the subtle visual similarity between the Volkswagen Golf GTI and the barrel of an automatic pistol that makes people want to get behind the wheel? And why is it that digital cameras in cell phones "click" even though they don't have a shutter? Sudjic's illuminating argument will resound with anyone who has ever been affected by how things look—lured, in other words, by the powerful siren call of design. *Hello World* Hannah Fry 2019-03-28

'One of the best books yet written on data and algorithms. . .deserves a place on the bestseller charts.' (The Times) You are accused of a crime. Who would you rather determined your fate - a human or an algorithm? An algorithm is more consistent and less prone to error of judgement. Yet a human can look you in the eye before passing sentence. Welcome to the age of the algorithm, the story of a not-too-distant future where machines rule supreme, making important decisions - in healthcare, transport, finance, security, what we watch, where we go even who we send to prison. So how much should we rely on them? What kind of future do we want? Hannah Fry takes us on a tour of the good, the bad and the downright ugly of the algorithms that surround us. In Hello World she lifts the lid on their inner workings, demonstrates their power, exposes their limitations, and examines whether they really are an improvement on the humans they are replacing. *She Reads Truth* Raechel Myers 2016-10-04  
She wants faith, hope, and love. She wants help

and healing. She wants to hear and be heard, to see and be seen. She wants things set right. She wants to know what is true—not partly true, or sometimes true, or almost true. She wants to see Truth itself, face-to-face. But here, now, these things are all cloudy. Hope is tinged with hurt. Faith is shaded by doubt. Lesser, broken things masquerade as love. How does she find something permanent when the world around her is always changing, when not even she can stay the same? And if she finds it, how does she hold on? *She Reads Truth* tells the stories of two women who discovered, through very different lives and circumstances, that only God and His Word remain unchanged as the world around them shifted and slipped away. Infused with biblical application and Scripture, this book is not just about two characters in two stories, but about one Hero and one Story. Every image points to the bigger picture—that God and His Word are true. Not because of anything we do, but because of who He is. Not once, not

occasionally, but right now and all the time. Sometimes it takes everything moving to notice the thing that doesn't move. Sometimes it takes telling two very different stories to notice how the Truth was exactly the same in both of them. For anyone searching for a solid foundation to cling to, *She Reads Truth* is a rich and honest Bible-filled journey to finally find permanent in a world that's passing away.

Hello World: A Life in Ham Radio - Danny Gregory 2003-03

To an outsider, the world of ham radio is one of basement transmitters, clunky microphones, Morse code, and crackly, possibly clandestine, worldwide communications, a world both mysterious and geeky. But the real story is a lot more interesting: indeed, there are more than two million operators worldwide, including people like Walter Cronkite and Priscilla Presley. Gandhi had a ham radio, as do Marlon Brando and Juan Carlos, king of Spain. Hello World takes us on a seventy-year odyssey through the world of ham radio. From 1927 until his death in 2001, operator Jerry Powell transmitted radio signals from his bedroom in Hackensack, New Jersey, touring the world's most remote locations and communicating with people from Greenland to occupied Japan. Once he made contact with a

fellow ham operator, he exchanged postcards known as QSLs cards with them. For seven decades, Powell collected hundreds of these cards, documenting his fascinating career in amateur radio and providing a dazzling graphic inventory of people and places far flung. This book is both an introduction to the fascinating world of ham and a visual feast for anyone interested in the universal language of graphic design.

Now, over the next twenty-four hours, Elle will have to decide between the life she has made with her genuinely beloved husband, Peter, and the life she always imagined she would have had with her childhood love, Jonas, if a tragic event hadn't

**The Worth of Water** - Gary White 2022-03-29  
From the founders of nonprofits Water.org & WaterEquity Gary White and Matt Damon, the incredible true story of two unlikely allies on a mission to end the global water crisis for good On any given morning, you might wake up and shower with water, make your coffee with water, flush your toilet with water—and think nothing of it. But around the world, more than three-quarters of a billion people can't do any of that—because they have no clean water source near their homes. And 1.7 billion don't have access to a toilet. This crisis affects a third of the people on the planet. It keeps kids out of school and women out of work. It traps people in extreme poverty. It spreads disease. It's also solvable. That conviction is what brought together movie actor Matt Damon and water

expert and engineer Gary White. They spent years getting the answer wrong, then halfway right, then almost right. Over time, they and their organization, Water.org, have found an approach that works. Working with partners across East Africa, Latin America, South Asia, and Southeast Asia, they've helped over 40 million people access water and/or sanitation. In *The Worth of Water*, Gary and Matt take us along on the journey—telling stories as they uncover insights, try out new ideas, and travel between the communities they serve and the halls of power where decisions get made. With humor and humility, they illuminate the challenges of launching a brand-new model with extremely high stakes: better health and greater prosperity for people all over the world. *The Worth of Water* invites us to become a part of this effort—to match hope with resources, to empower families and communities, and to end the global water crisis for good. All the authors' proceeds from the sale of this book will be

donated to Water.org.

2013-09-10

The phenomenon returns! Originally published in 1987, *The Book of Questions*, a New York Times bestseller, has been completely revised and updated to incorporate the myriad cultural shifts and hot-button issues of the past twenty-five years, making it current and even more appealing. This is a book for personal growth, a tool for deepening relationships, a lively conversation starter for the family dinner table, a fun way to pass the time in the car. It poses over 300 questions that invite people to explore the most fascinating of subjects: themselves and how they really feel about the world. The revised edition includes more than 100 all-new questions that delve into such topics as the disappearing border between man and machine—How would you react if you learned that a sad and beautiful poem that touched you deeply had been written by a computer? The challenges of being a

parent—Would you completely rewrite your child’s college-application essays if it would help him get into a better school? The never-endingly interesting topic of sex—Would you be willing to give up sex for a year if you knew it would give you a much deeper sense of peace than you now have? And of course the meaning of it all—If you were handed an envelope with the date of your death inside, and you knew you could do nothing to alter your fate, would you look? The Book of Questions may be the only publication that challenges—and even changes—the way you view the world, without offering a single opinion of its own.

Smith: 'A sweet story of summer love' Sunday Express 'Packed with fun and romance, this uplifting You've Got Mail-style story is totally charming' Closer 'A gorgeous,

heartwarming reminder of the power of fate' New York Times Book Review **Hello World** - Alice Rawsthorn 2014-02-06 Our gadgets, appliances, and cars are sleeker and more elegant than they've ever been; in our free time, we trawl the internet for pictures of flawless minimalist interiors; and even the great industrialist of our time—Steve Jobs—is admired more for his visual savvy than his technological inventiveness. And yet with Instagram and Pinterest at our fingers and great design more available—and more affordable—than ever, we've had no guidebook to this ever-fascinating field. Though it's an inescapable part of our lives, there has been no single book that could, in one fell swoop, tell us everything we need to know about design. Enter Hello World. The design critic for the International Heard Tribune, Alice Rawsthorn has spent many years reckoning with the history of design and with its place in contemporary life, and Hello World is the extraordinary summation of her research

and reporting. Rawsthorn takes us on a trip through design that ranges across continents and centuries, and wherever she goes, she discovers inspiring, thrilling examples of resourcefulness, inventiveness, and sheer vision. From the macabre symbol with which eighteenth-century pirates terrorized their victims into surrender, to one woman's quest for the best prosthetic legs, to the evolution of the World Cup soccer ball, Hello World describes how warlords, scientists, farmers, hackers, activists, and professional designers have used the complex, often elusive process of design to different ends throughout history. Hailed as a "rapid-fire and illuminating ode to contemporary design" (Telegraph) and "an extremely readable tour of the subject" (Financial Times), Hello World is a major work that radically broadens our understanding of what design can mean, and explains how we can use it to make sense of our ever-changing universe.

**I Hope They Serve Beer In Hell** - Tucker Max

2012-03-01

The "highly entertaining and thoroughly reprehensible" #1 New York Times bestseller—now with sixteen pages of photos and a new introduction (The New York Times). My name is Tucker Max, and I am an asshole. I get excessively drunk at inappropriate times, disregard social norms, indulge every whim, ignore the consequences of my actions, mock idiots and posers, sleep with more women than is safe or reasonable, and just generally act like a raging dickhead. But, I do contribute to humanity in one very important way: I share my adventures with the world. --from the Introduction Actual reader feedback: "I find it truly appalling that there are people in the world like you. You are a disgusting, vile, repulsive, repugnant, foul creature. Because of you, I don't believe in God anymore. No just God would allow someone like you to exist." "I'll stay with God as my lord, but you are my savior. I just finished reading your brilliant stories, and I laughed so

hard I almost vomited. I want to bring that kind of joy to people. You're an artist of the highest order and a true humanitarian to boot. I'm in both shock and awe at how much I want to be you."

*Design as an Attitude* Alice Rawsthorn 2018  
Authoritative and engaging, *Design as an Attitude* explains how design is responding to an age of intense economic, political, and ecological instability. It shows how resourceful designers are using new digital tools to help to tackle the environmental and refugee crises, and to reinvent dysfunctional social services. The book charts different aspects of contemporary design: from its role in interpreting new technologies and the emergence of a new wave of digitally empowered designers in Africa, to the craft revival, design's gender politics, design's contribution to tackling the environmental crisis and climate change, and its use in expressing our increasingly fluid personal identities. *Design as an Attitude* also tells the stories of the new

design adventurers, such as Irma Boom, Studio Formafantasma, Jing He, and Hella Jongerius, among others. *Design as an Attitude* consists of an introduction followed by 12 chapters: What is Attitudinal Design?; Spot the Difference--Design and Art; The Craft Revival; The Descent of Objects; Back to the Future; Is Design Still a (cis) Man's World?; Design's Colour Problem; The Fun of the Fair; Choices, Choices, Choices; Out of Control; Design and Desire; and, When the Worst Comes to the Worst. An award-winning design critic and author, Alice Rawsthorn OBE (b.1958, Manchester) wrote a weekly design column for *The New York Times*, which was syndicated worldwide for over a decade. Her previous books include the critically acclaimed, *Hello World: Where Design Meets Life* (2013). Based in London, Rawsthorn speaks on design at global events, including TED and the World Economic Forum in Davos. This book is part of the JRP Ringier Documents series, co-published with Les presses du réel and

dedicated to critical writing.

**Dear Data** - Giorgia Lupi 2016-09-13

Equal parts mail art, data visualization, and affectionate correspondence, Dear Data celebrates "the infinitesimal, incomplete, imperfect, yet exquisitely human details of life," in the words of Maria Popova (Brain Pickings), who introduces this charming and graphically powerful book. For one year, Giorgia Lupi, an Italian living in New York, and Stefanie Posavec, an American in London, mapped the particulars of their daily lives as a series of hand-drawn postcards they exchanged via mail weekly—small portraits as full of emotion as they are data, both mundane and magical. Dear Data reproduces in pinpoint detail the full year's set of cards, front and back, providing a remarkable portrait of two artists connected by their attention to the details of their lives—including complaints, distractions, phone addictions, physical contact, and desires. These details illuminate the lives of two remarkable young

women and also inspire us to map our own lives, including specific suggestions on what data to draw and how. A captivating and unique book for designers, artists, correspondents, friends, and lovers everywhere.

**Creative Confidence** - Tom Kelley 2013-10-15  
IDEO founder and Stanford d.school creator David Kelley and his brother Tom Kelley, IDEO partner and the author of the bestselling The Art of Innovation, have written a powerful and compelling book on unleashing the creativity that lies within each and every one of us. Too often, companies and individuals assume that creativity and innovation are the domain of the "creative types." But two of the leading experts in innovation, design, and creativity on the planet show us that each and every one of us is creative. In an incredibly entertaining and inspiring narrative that draws on countless stories from their work at IDEO, the Stanford d.school, and with many of the world's top companies, David and Tom Kelley identify the

principles and strategies that will allow us to tap into our creative potential in our work lives, and in our personal lives, and allow us to innovate in terms of how we approach and solve problems. It is a book that will help each of us be more productive and successful in our lives and in our careers.

**The Design of Everyday Things** - Don Norman  
2013-11-05

Even the smartest among us can feel inept as we fail to figure out which light switch or oven burner to turn on, or whether to push, pull, or slide a door. The fault, argues this ingenious—even liberating—book, lies not in ourselves, but in product design that ignores the needs of users and the principles of cognitive psychology. The problems range from ambiguous and hidden controls to arbitrary relationships between controls and functions, coupled with a lack of feedback or other assistance and unreasonable demands on memorization. *The Design of Everyday Things*

shows that good, usable design is possible. The rules are simple: make things visible, exploit natural relationships that couple function and control, and make intelligent use of constraints. The goal: guide the user effortlessly to the right action on the right control at the right time. In this entertaining and insightful analysis, cognitive scientist Don Norman hails excellence of design as the most important key to regaining the competitive edge in influencing consumer behavior. Now fully expanded and updated, with a new introduction by the author, *The Design of Everyday Things* is a powerful primer on how—and why—some products satisfy customers while others only frustrate them.

*Designing Your Life* Bill Burnett 2016-09-20

In this book, Bill Burnett and Dave Evans show us how design thinking can help us create a life that is both meaningful and fulfilling, regardless of who or where we are, what we do or have done for a living, or how young or old we are.
