The Elements of Typographic Style - 2008

Typographically Speaking - Margaret Re 2003-07
In a career that has spanned more than forty years, Matthew Carter has designed many of the typefaces that we see every day in and on publications, books, signs, and screens. Carter's celebrated typefaces include such stalwarts as Galliard, Mantinia, and Verdana. In 1975, he created the now-pervasive Bell Centennial specifically for use in phone books. Publications including Sports Illustrated, the Daily News, Wired, and the Washington Post, along with cultural institutions such as the Walker Arts Center and The Victoria & Albert Museum, have all commissioned Carter fonts. Typographically Speaking: The Art of Matthew Carter entered the field in the days of hand-cut punches and hot-metal type, and has continued to innovate through the eras of photocomposition and digital design. Essays discuss the form of his work, his position and use of typographic history, and his technological innovation. All of his fonts are reproduced in full for reference, and illustrations place his designs in context. Published in conjunction with the University of Maryland Baltimore County.

Anatomy of a Typeface - Alexander S. Lawson 1990
To the layman, all printing types look the same. But for typographers, graphic artists, and others of that lunatic fringe who believe that the letters we look at daily (and take entirely for granted) are of profound importance, the question of how letters are formed, what shape they assume, and how they have evolved remains one of passionate concern. That exploration of letter forms, and their division and classification into "families" or generic groupings, is the heart of this comprehensive study. Written by an expert who has examined letters all his life, this monumental analysis of letter forms considers a broad and representative range of international typefaces. Lawson explores the vast territory of types, their development and uses, their antecedents and offspring, with precision, insight, and clarity. From Garamond to Bembo to the design and manufacture of sans-serif letters and newspaper types, this is the first full-scale investigation of typefaces since D. B. Updike's classic Printing Types was published in 1922.
Writing & Illuminating, & Lettering - Edward Johnston 1925

W. A. Dwiggins - Bruce Kennett 2017-08-15
WILLIAM ADDISON DWIGGINS (1880-1956) was the most influential graphic designer of the early twentieth century. A master calligrapher

and lettering artist, he was also one of the best type designers and typographers of his generation, a prolific and influential book designer and illustrator, an accomplished private press printer, a pioneer of advertising and editorial design, a noted author of both fiction and nonfiction, and a marionettist whose contributions to that field are still revered today.This groundbreaking monograph provides the first full account of Dwiggins's remarkably creative spirit, invention, and wit. Over 1,200 illustrations -- all photographed with raking light and printed using stochastic screening for pop-off-the-page immediacy -- provide a vivid overview of his career, revealing Dwiggins's phenomenal range and originality.

Linotype Palatino Nova - Hermann Zapf 2003

Letter Fountain - Joep Pohlen 2015
In addition to examining the form and anatomy of every letter in the alphabet, punctuation marks and special characters, the book examines over 150 typefaces, their origins, and font characteristics, visually explained by full page tables including scale, weight, and useful alternatives. Cross-references allow typefaces to exist in a broader visual culture context, comparing important designs with seminal artpieces and movements, from Gutenbergrsquo;s era to today. Special attention is also given to the aesthetics of the digital age and the choice of the right typeface for a job. Rounding out the guide are an in-depth comparison between sans-serif and serif typefaces, an essay about measuring systems and indications, advice about typographic rules, plus a manual for developing digital fonts.

Palatino - Robert Bringhurst 2016
Typographer, translator, cultural historian, poet, and linguist Robert Bringhurst presents a taxonomic study of the many iterations of the typeface Herman Zapf's Palatino, along with a broader overview of the cultural history of type design. This is an important book, writes David R. Godine, "that argues, as eloquently and as convincingly as has ever been argued, that type design belongs squarely in the humanist tradition, that it is as much a member of the fine arts as painting and printmaking and

calligraphy."

Type Revivals Jerry Kelly 2019
For typographers, revival type forms an integral part of their font repertoire (whether they realize it or not). Older classics such as Baskerville, Garamond, and Bodoni are ubiquitous as imbedded fonts in standard operating system collections. They continue to serve their users well, being the trusted go-to tools of professional designers. Yet all revivals are interpretations of lost originals, or, in the rare instances where some original material survives, have been translated into digital fonts that can be used on today's computers. In almost every case, there is, and has to be, considerable selection, revising, and re-formatting involved. The nature of such work is little understood or appreciated. Indeed, the definition, application, and use of type revivals has been

neglected in literature, or worse, this has been almost totally misunderstood. Jerry Kelly's Type Revivals sheds new light on the subject, reviewing hundreds of important modern versions of earlier typefaces, and presenting clear and concise discussions of their origins, permutations, and contemporary digital availability. No one in a position to select a typeface, or use type in a book work, should be without it.
CHARLES DICKENS - WALTER E. SMITH 2019

The Tribune Book of Open-air Sports - Henry Hall 1887
This is the first book printed from type set on the linotype composing machine invented by Ottmar Mergenthaler.
Alphabet Stories - Hermann Zapf 2007
"Hermann's story is most indelibly recorded in his calligraphy, his typography, and in all his typefaces. It is in the friendships he has made, the people far and wide that he has inspired, and in the example that he has set. However much new technologies of communication challenge our paradigms of the book and however many new trends came and go, Hermann Zapf has mastered his discipline so purely and so elegantly that his works will remain beautiful and fresh forever." --Postscript.

Revival Type - Paul Shaw 2017-04-18
An illuminating account of the design inspirations and technical transformations that have shaped the digital typefaces of the 21st century In this fascinating tour through typographic history, Paul Shaw provides a visually rich exploration of digital type revival. Many typefaces from the pre-digital past have been reinvented for use on computers and mobile devices, while other new font designs are revivals of letterforms, drawn from inscriptions, calligraphic manuals, posters, and book jackets. Revival Type deftly introduces these fonts, many of which are widely used, and engagingly tells their stories. Examples include translations of letterforms not previously used as type, direct

revivals of metal and wood typefaces, and looser interpretations of older fonts. Among these are variations on classic designs by John Baskerville, Giambattista Bodoni, William Caslon, Firmin Didot, Claude Garamont, Robert Granjon, and Nicolas Jenson, as well as typefaces inspired by less familiar designers, including Richard Austin, Philippe Grandjean, and Eudald Pradell. Updates and revisions of 20th-century classics such as Palatino, Meridien, DIN, Metro, and Neue Haas Grotesk (Helvetica) are also discussed. Handsomely illustrated with annotated examples, archival material depicting classic designs, and full character sets of modern typefaces, Revival Type is an essential introduction for designers and design enthusiasts into the process of reinterpreting historical type.
Digital Typography - Donald E. Knuth 1999-03-13
Donald Knuth's influence in computer science ranges from the invention of literate programming to the development of the TeX programming language. One of the foremost figures in the field of mathematical sciences, Knuth has written papers which stand as milestones of development over a wide range of topics. In this collection, the second in the series, Knuth explores the relationship between computers and typography. The present volume, in the words of the author, is the legacy of all the work he has done on typography. When type designers, punch cutters, typographers, book historians, and scholars visited the University while Knuth was working in this field, it gave to Stanford what some consider to be its golden age of digital typography. By the author's own admission, the present work is one of the most difficult books that he has prepared. This is truly a work that only Knuth could have produced.

Hunt Roman - Hermann Zapf 1965

Alphabet Stories - Hermann Zapf 2007
Written as an anecdotal first-person account, the reader is treated to famed German calligrapher and typographer Hermann Zapf's personal recollections of technical breakthroughs. Zapf reveals milestones tracing his education in 1930s Germany, to his work on forefront of computer-aided typesetting in the 1970s, to the tour de force design of a complex calligraphic font-Zapfino in the late '90s. Vivid reproductions of Zapf's calligraphy, production proofs, typographic specimens, and photographs complete the portrait of one of the most prolific designers of our time. After a complete sell-out of the American edition, RIT Press is releasing a

second edition of Alphabet Stories: A Chronicle of Technical Developments. This new edition is enhanced by the addition of a letterpress-printed broadside designed by Zapf. The insert was typeset and printed at the RIT Cary Graphic Arts Collection using its collection of rare metal "Virtuosa" type - Zapf's elegant script face originally released by Stempel Typefounders in 1952. This book is the first Hermann Zapf monograph to be typeset in the new Palatino Nova and Palatino Sans digital typefaces issued by Linotype.

Spend Your Alphabets Lavishly! - David Pankow 2005-05

The Zapfs' 50-year relationship with Rochester Institute of Technology is feted in this exhibition and catalogue, sponsored by RIT¿s Melbert B. Cary, Jr. Graphic Arts Collection. The show presents rare holdings of Zapf materials held at the Cary Collection¿the foremost Zapf archive outside of Germany.

Designing Type - Karen Cheng 2020-10-20
The now-classic introduction to designing typography, handsomely redesigned and updated for the digital age In this invaluable book, Karen Cheng explains the processes behind creating and designing type, one of the most important tools of graphic design. She addresses issues of structure, optical compensation, and legibility, with special emphasis given to the often-overlooked relationships between letters and shapes in font design. In this second edition, students and professional graphic designers alike will benefit from an expanded discussion of the creative practice of designing type—what designers need to consider, their rationale, and issues of accessibility—in the context of contemporary processes for the digital age. Illustrated with more than 400 diagrams that demonstrate visual principles and letter construction, ranging from informal progress sketches to final type designs and diagrams, this essential guide analyzes a wide range of classic and modern typefaces, including those from many premier type foundries. Cheng's text covers the history of type, the primary systems of typeface classification, the

parts of a letter, and the effects of new technology on design methodology, among many other key topics.

Paul Rand - Franc Nunoo-Quarcoo 2003
Paul Rand: Modernist Design illuminates Rand's role as a major figure at the epicenter of twentieth-century art and design. This book is a compendium of essays, tributes, interviews, dialogues, photographic reproductions, contextual timeline, extensive bibliography, and impressions of Rand's impact on modern communication practice and theory. We know Paul Rand through the advertising, editorial, publishing, institutional, identity, corporate, and intellectual legacy he left behind. For him, modernism was a way of life and a belief form, not a style. Like the European proponents, he understood the tenets of modernism as those which could be employed to better human experience in the modern world. He gave life to his art, definition to graphic design, and a reputation to a discipline in need of the evocation of enduring quality. Rand's contemporaries, students, and friends knew a man of even more extraordinarily cultivated and diverse talents and interests. He was an early voice in proposing the essence of modernist theories in visual communication. Rand was both ruthlessly pragmatic and a visionary. Paul Rand: Modernist Design adds to the growing literature on Paul Rand, helping to place him in the proper context within a century of innovative art, design, architecture, science, and technology.

Typophile Chap Books - 1960

Der Typograph Hermann Zapf - Nikolaus Julius Weichselbaumer 2015-12-14
Hermann Zapf (1918–2015) gilt als einer der bedeutendsten Schriftgestalter, Kalligraphen und Typographen des 20. Jahrhunderts. Sein Werk überspannt mehr als sieben Jahrzehnte, in denen er Schriftklassiker wie Palatino, Optima und Zapfino vorgelegt hat. Daneben war Zapf als Buchgestalter, Berater, Dozent, Unternehmer, Künstler und Aktivist in Urheberrechtsfragen tätig. Die vorliegende Studie nähert sich diesem Werk auf Basis des umfassenden, an der der Herzog August Bibliothek verwahrten Eigenarchivs des Gestalters.

Untersuchungsleitend ist ein feldtheoretisches Konzept von Gestaltung, das Fragen zu Entwurfstechniken und dem Einfluss von Satztechnologien aufwirft, aber auch nach der Entstehung von Zapfs Ansehen und dem Aufbau seines Beziehungsnetzwerks. Durch die Verortung Zapfs im Kontext seiner Zeitgenossen wird mit dieser Werkbiografie ein Schlaglicht auf die Typographie der 2. Hälfte des 20. Jahrhunderts geworfen.

About More Alphabets - Jerry Kelly 2011
Typophile Chapbook, New Series, 3. "Letterforms are things that nearly all of us in the Western world have learned to take for granted. We treat them much like door knobs, water taps, thermostats, and hinges. We evidently think (in defiance of all logic) that what we read or write matters far more than how it's read or written, and that letterforms are just a way to get there, as a door knob is a way to open a door," writes Robert Bringhurst in the Foreword to About More Alphabets. This book hopes to bring attention to a neglected topic by focusing on the letterforms of Hermann Zapf. From metal type to the digital characters, Hermann Zapf has composed exceptional type designs for seventy years. He can be considered one of the most important calligraphers of all time, as well as a most notable book designer and typographer. His typefaces are among the most beautiful and familiar in the world. This book, a companion volume to the Typophile Chapbook About Alphabets (1960, updated 1970), describes Zapfs post-1970 type designs and provides new research on many of the earlier types. In this volume, typographer and calligrapher Jerry Kelly describes the origins and history of numerous Hermann Zapf typefaces including Marconi, ITC Zapf International, Linotype Zapfino, and Zapf Civilité. Kelly also includes new information on the Palatino nova and Optima nova families. This new Typophiles Chapbook is profusely illustrated with type specimens and drawings, many of which have never before been reproduced. Illustrations include drawings by Zapf, comparisons of various types, early sketches, typefaces never issued, and a twenty-eight page image section of type specimens. Other types described include Hallmark Textura, AMS Euler fraktur bold, Zapf Renaissance italic swash, Medici script, Aurelia, AMS

Euler, Zapf Renaissance, ITC Zapf Chancery, and Zapf Civilité. Robert Bringhurst calls Zapf one of historys greatest two-dimensional architects. He says, "Hermann Zapf has made letters so subtle, so lovely they bring tears to knowledgeable eyes. And there are very few people who know Zapfs work as well as Jerry Kelly. Read him and weep."

Inside Paragraphs - Cyrus Highsmith 2020-08-25
What goes on inside a paragraph of printed text? Cyrus Highsmith's Inside Paragraphs is an essential primer on the basics of typography that focuses specifically on the role of printed text within a paragraph. Engaging full-page illustrations and Highsmith's accessible explanations show the role of white space between letters, words, and lines. Perfect for students and professionals alike, this updated edition includes a new preface.

Hermann Zapf and the World He Designed - Jerry Kelly 2022-05-20
This is the first comprehensive biography of Hermann Zapf (1918-2015), whom Robert Bringhurst has called "the greatest type designer of our time, and very possibly the greatest type designer of all time."002018 marked the 100th anniversary of the birth of both Hermann Zapf and Gudrun Zapf von Hesse. Hermann Zapf's contribution to type design and calligraphy is immeasurable. His typographic work alone has greatly expanded the language of letterforms through ubiquitous fonts such as Palatino, Optima, and Zapfino (to name a few). Zapf's typefaces have become among the most used -- and most admired -- of all time, and he is arguably the most important type designer of the 20th century.00No less important, though perhaps less well known, is his work in typography and book design. Zapf has also been at the forefront of type technology. His Marconi alphabet design was the first typeface ever created specifically for digital typography. Also noteworthy is Zapf's calligraphic art. It first became widely disseminated in his writing manual Pen and Graver (1949), and has since been seen in numerous books and exhibitions, and has been a major influence on generations of calligraphers.00Exhibition: The Grolier Club, New York, USA (20.02.-27.04.2019).

History of the Linotype Company - Frank J. Romano 2014-05-01

From the Victorian era to the start of the twenty-first century, the Mergenthaler Linotype Company dominated the typesetting and printing industries. Unlike previous books which have ended with the invention of the Linotype, Frank Romano tells the rest of the story. This book details the products, the people, and the corporate activities that kept the company ahead of its competition in hot metal, phototypesetting, and pre-press technology. Over ten corporate entities eventually formed the U.S. manufacturer, which ended its corporate life as a division of a German press maker. What began in 1886 ended finally in May 2013, when the Linotype Library division of Monotype Imaging was closed down. After 127 years, the last resting place of the history of the Linotype Company is in this book.

Typographic Design - Rob Carter 2012-01-04

Thoroughly updated to maintain its relevancy in today's digital world, Typographic Design, Fifth Edition continues to provide a comprehensive overview of every aspect of designing with type. This Fifth Edition of the bestselling text in the field offers detailed coverage of such essential topicsas the anatomy of letters and type families, typographic syntax and communication, design aesthetics, and designing for legibility. Supplementing these essential topics are theoretical and structural problem-solving approaches by some of the leading design educators across the United States. Unwrapping the underlying concepts about typographic form and message, Typographic Design, Fifth Edition includes four pictorial timelines that illustrate the evolution of typography and writing within the context of world events—from the origins of writing more than 5,000 years ago to contemporary typographic applications. innovative typographic design processes Material presented in full color throughout with many new images

An A-Z of Type Designers - Neil Macmillan 2006-01-01
Review: "This illustrated A-Z features outstanding type designers from around the world, from Gutenberg to the present day. Arranged alphabetically by designer's name, the book contains over 260 biographical profiles. Entries are illustrated by key typefaces taken from a wide range of sources, including type specimens, original posters, private press editions and magazine covers, and also give a list of work and, where applicable, further reading references and a website address. An essential reference for typographers, graphic designers and students, the book also features a full index and eight short texts by leading typographers - Jonathan Barnbrook, Erik van Blokland, Clive Bruton, John Downer, John Hudson, Jean Francois Porchez, Erik Spiekermann and Jeremy Tankard - that cover a variety of different aspects of type design, including typeface revivals, font piracy, designing fonts for corporate identities and the role of nationality in type design."--BOOK JACKET

Palatino - Robert Bringhurst 2016
Hermann Zapf was one of the great practitioners of the graphic arts. As a book designer, type designer, an advocate, a teacher and above all, as a calligrapher, the world has seldom seen his equal. To do his achievement justice, author Robert Bringhurst takes as his theme Palatino, probably the most widely known and used of all Hermann Zapf faces. Mr. Bringhurst traces its development, with all its infinite permutations, and often invisible refinements through a long and fascinating history of variations and permutations, imitations and conflations--from hot metal, through the brief interlude of film setting and finally into the digital world. It is all here, in encompassing detail: a fully illustrated account of Palatino and its extended family: foundry and Linotype, Michelangelo, Sistina, Aldus, Heraklit, Phidias, Zapf Renaissance, PostScript Palatino, Palatino and Aldus Nova, and Palatino Sans. Included with the text are over 200 illustrations of design sketches, working drawings, smoke proofs and test prints, matrices, foundry and Linotype patterns. But beyond that, the book is an argument that artists who create letters can, and should, be judged by the same standards and held in the same esteem as composers who write music and artists who paint on canvas. Bringhurst asks the question, "Can a penstroke or a letterform be so beautiful it will stop you in your tracks and maybe break your heart?" In this groundbreaking and totally original book, he answers the question: "It can."
