Fallocaust - Quil Carter 2014-07-09

Over two hundred and thirty years ago the Fallocaust happened, killing almost everything that lived and creating what is now known as the greywastes. A dead wasteland where cannibalism is a necessity, death your reality, and life before the radiation nothing but pictures in dog-eared magazines. Reaver is a greywaster, living in a small block controlled by a distant ruler said to have started the Fallocaust. He is a product of the savage world he was raised in and prides himself on being cold and cruel. Then someone new to his town catches his eye, someone different than everyone else. Without knowing why he starts to silently stalk him, unaware of where it will lead him.

Media Performance - Denis McQuail 1992-06-24

This major text by the author of Mass Communication Theory offers a comprehensive analysis of the growing field of assessment and evaluation of the performance of mass media. Across different societies, with varying media systems, there is evidence of increasing concern with the nature and quality of media output as well as about the independence and diversity of media systems. In this broad-ranging overview, Denis McQuail outlines the varying means of media performance assessment which have been attempted. He analyzes the central questions of what the 'public interest' means in this context, which criteria are relevant for assessing media performance, how such values are established and how

they can be reconciled with the economic,

Enhancing Cognitive Fitness in Adults - PAULA HARTMAN-STEIN 2011-08-02

Late life is characterized by great diversity in memory and other cognitive functions. Although a substantial proportion of older adults suffer from Alzheimer's disease or another form of dementia, a majority retain a high level of cognitive skills throughout the life span. Identifying factors that sustain and enhance cognitive well-being is a growing area of original and translational research. In 2009, there are as many as 5.2 million Americans living with Alzheimer's disease, and that figure is expected to grow to as many as 16 million by 2050. One in six women and one in 10 men who live to be at least age 55 will develop Alzheimer's disease in their remaining lifetime. Approximately 10 million of the 78 million baby boomers who were alive in 2008 can expect to develop Alzheimer's disease. Seventy percent of people with Alzheimer's disease live at home, cared for by family and friends. In 2008, 9.8 million family members, friends, and neighbors provided unpaid care for someone with Alzheimer's disease or another form of dementia. The direct costs to Medicare and Medicaid for care of people with Alzheimer's disease amount to more than \$148 billion annually (from Alzheimer's Association, 2008 Alzheimer's Disease Facts and Figures). This book will highlight the research foundations behind brain fitness interventions as

well as showcase innovative community-based programs to maintain and promote mental fitness and intervene with adults with cognitive

impairment. The emphasis is on illustrating the nuts and bolts of setting up and utilizing cognitive health programs in the community, not just the laboratory.
