Essays in Islamic Philology, History, and Philosophy Alireza Korangy 2016-05-24
The articles in this volume are dedicated to Professor Ahmad Mahdavi Damghani for the

breadth and depth of his interests and his influence on those interests. They attest to the fact that his fervor and rigorously surgical attention to detail have found fertile ground in a wide variety of disciplines, including (among others) Persian literature and philology; Islamic history and historiography; Arabic literature and

philology; and Islamic philosophy and jurisprudence. The volume has brought together some of the most respected scholars in the fields of Islamic studies and Islamic literatures, all his prior students, to contribute with articles that touch on the fields Professor Mahdavi Damghani has so permanently touched with his astonishing scholarship and attention to detail.

World of Image in Islamic Philosophy - L. W. C. van Lit 2017-04-30

One of the most controversial issues that divided Islamic philosophers and theologians during the Middle Ages was whether human beings would have a spiritual or bodily existence after death. The idea of a world of image was conceived as a solution, suggesting that there exists a world of non-physical (imagined) bodies, beyond our earthly existence. This world may be reached in sleep, in meditation or after death. From the embryonic conception by Ibn Sina, to the radical rethinking by Suhrawardi and Shahrazuri into a sophisticated system, L. W. C. van Lit unravels

the history of this idea. Using a distant reading approach for measuring the transmission, he further shows how the idea remained relevant for Muslim thinkers through the centuries, up until today.

Montgomery Watt 2017-08-01

Events are making clear to ever-widening circles of readers the need for something more than a superficial knowledge of non-European cultures. In particular, the blossoming into independence of numerous African states, many of which are largely Muslim or have a Muslim head of state,

has made clear the growing political importance of the Islamic world, and, as a result, the desirability of extending and deepening the understanding and appreciation of this great segment of mankind. Islamic philosophy and theology are looked at together in a chronological framework in this volume. From a modern standpoint, this juxtaposition of the two disciplines is important for the understanding of both; but it should be realized at the outset that it is a reversal of the traditional Islamic procedure. Not merely were the disciplines different, but in the earlier centuries the exponents were two different sets of persons, trained in two different educational traditions, each with its own separate institutions. There was little personal contact between philosophers and theologians, and the influence of the two disciplines on one another was largely by way of polemics. Eventually while philosophy died out as a separate discipline in the Islamic world, many parts of it were incorporated in theology.

This work is designed to give the educated reader something more than can be found in the usual popular books. The work undertakes to survey a special part of the field, and to show the present stage of scholarship. Where there is a clear picture this will be given; but where there are gaps, obscurities and differences of opinion, these will also be indicated. This work is brilliant in its design, style, and intimate understanding. It is a must read for specialists and policy makers alike.

A Brief Introduction to Islamic Philosophy -

Oliver Leaman 2000-04-14

Islamic philosophy represents one of the most important philosophical traditions in the world.

Ibn Khaldūn's Philosophy of History by

Mahdi 2015-10-14

This book, first published in 1957, is the study of 14th-century Arab historian Ibn Khaldun, who founded a special science to consider history and culture, based on the philosophy of Plato and Aristotle and their Muslim followers. In no other field has the revolt of modern Western thought against traditional philosophy been so far-reaching in its consequences as in the field of

history. Ibn Khaldun realized that history is more immediately related to action than political philosophy because it studies the actual state of man and society. He found that the ancients had not made history the object of an independent science, and thought it was important to fill this gap. A factual acquaintance with the conclusions of Ibn Khaldun's reflections on history is not the same as the full comprehension of their theoretical significance. When these fundamental questions are answered, it becomes possible to pose the specific question of the relation of Ibn Khaldun's philosophy of history, or his new science of culture, to other practical sciences and, particularly, to the art of history. After an exposition of the major trends of Islamic historiography, part of this book attempts to answer this question through the analysis of the method and intention of the sections of the 'History' where Ibn Khaldun himself examines the works of major Muslim historians, shows the necessity of the new science of culture, and

distinguishes it from other practical sciences. *A History of Islamic Philosophy* - Majid Fakhry 2004

The first comprehensive survey of Islamic philosophy from the seventh century to the present, this classic discusses Islamic thought and its effect on the cultural aspects of Muslim life. Fakhry shows how Islamic philosophy has followed from the earliest times a distinctive line of development, which gives it the unity and continuity that are the marks of the great intellectual movements of history.

History of Islamic Political Thought - Antony Black 2011-07-19

Second edition of the history of Islamic political thought that traces its roots from early Islam to the current age of Fundamentalism (622 AD to 2010 AD).

The Heart of Islamic Philosophy William C. Chittick 2001-10-11

This book introduces the work of an important medieval Islamic philosopher who is little known

outside the Persian world. Afdal al-Din Kashani was a contemporary of a number of important Muslim thinkers, including Averroes and Ibn al-Arabi. Kashani did not write for advanced students of philosophy but rather for beginners. In the main body of his work, he offers especially clear and insightful expositions of various philosophical positions, making him an invaluable resource for those who would like to learn the basic principles and arguments of this philosophical tradition but do not have a strong background in philosophy. Here, Chittick uses Kashani and his work to introduce the basic issues and arguments of Islamic philosophy to modern readers.

An Introduction to Classical Islamic Philosophy - Oliver Leaman 2002

A revised and expanded 2001 edition of Oliver Leaman's classic introductory work.

[Al-Ghazali's Philosophical Theology](#) - Frank Griffel 2009-05-28

The Muslim thinker al-Ghazali (d. 1111) was one

of the most influential theologians and philosophers of Islam and has been considered an authority in both Western and Islamic philosophical traditions. Born in northeastern Iran, he held the most prestigious academic post in Islamic theology in Baghdad, only to renounce the position and teach at small schools in the provinces for no money. His contributions to Islamic scholarship range from responding to the challenges of Aristotelian philosophy to creating a new type of Islamic mysticism and integrating both these traditions-falsafa and Sufism-into the Sunni mainstream. This book offers a comprehensive study of al-Ghazali's life and his understanding of cosmology-how God creates things and events in the world, how human acts relate to God's power, and how the universe is structured. Frank Griffel presents a serious revision of traditional views on al-Ghazali, showing that his most important achievement was the creation of a new rationalist theology in which he transformed the

Aristotelian views of thinkers such as Avicenna to accord with intellectual currents that were well-established within Muslim theological discourse. Using the most authoritative sources, including reports from al-Ghazali's students, his contemporaries, and his own letters, Griffel reconstructs every stage in a turbulent career.

The al-Ghazali that emerges offers many surprises, particularly on his motives for leaving Baghdad and the nature of his "seclusion" afterwards. Griffel demonstrates that al-Ghazali intended to create a new cosmology that moved away from concerns held earlier by Muslim theologians and Arab philosophers. This new theology aimed to provide a framework for the pursuit of the natural sciences and a basis for Islamic science and philosophy to flourish beyond the 12th century. Al-Ghazali's Philosophical Theology is the most thorough examination to date of this important thinker.

Books of Definition in Islamic Philosophy - Kiki Kennedy-Day 2003-09-02

Islamic Philosophy has unusual origins. Originally a hybrid of Greek philosophy and early Islamic theology, its technical language consisted of a number of words translated from the Greek. This book studies how Islamic philosophers of the ninth century AD, such as al-

Kindi, al-Farabi and Ibn Sina, developed an indigenous set of terms and concepts. Their Books of Definition influenced the revision of the Arabic language to incorporate these new fields of knowledge. Books of Definition in Islamic Philosophy: The Limits of Words uses the work of these philosophers as a basis from which a comparison with their Greek precedents is enabled. The book presents a framework for incorporating an Islamic and historically contextualised philosophy into a continuum of world philosophers. At the core of this framework is Ibn Sina's Kitab al-hudud which the author has translated into English and situates it in its correct geopolitical framework. In establishing a historical and literary context for the writing and circulation of Ibn Sina's definitions, the book breaks new ground in the integration of Islamic philosophy within a general history of philosophies. This fascinating and comprehensive study will be of interest to scholars and postgraduate students of Islamic

Philosophy.

Classical Philosophy - Peter Adamson

2014-06-26

Classical Philosophy is the first of a series of books in which Peter Adamson aims ultimately to present a complete history of philosophy, more thoroughly but also more enjoyably than ever before. In short, lively chapters, based on the popular History of Philosophy podcast, he offers an accessible, humorous, and detailed look at the emergence of philosophy with the Presocratics, the probing questions of Socrates, and the first full flowering of philosophy with the dialogues of Plato and the treatises of Aristotle. The story is told 'without any gaps', discussing not only such major figures but also less commonly discussed topics like the Hippocratic Corpus, the Platonic Academy, and the role of women in ancient philosophy. Within the thought of Plato and Aristotle, the reader will find in-depth introductions to major works, such as the Republic and the Nicomachean Ethics, which are

treated in detail that is unusual in an introduction to ancient philosophy. Adamson looks at fascinating but less frequently read Platonic dialogues like the Charmides and Cratylus, and Aristotle's ideas in zoology and poetics. This full coverage allows him to tackle ancient discussions in all areas of philosophy, including epistemology, metaphysics, philosophy of language, philosophy of science, ethics and politics. Attention is also given to the historical and literary context of classical philosophy, with exploration of how early Greek cosmology responded to the poets Homer and Hesiod, how Socrates was presented by the comic playwright Aristophanes and the historian Xenophon, and how events in Greek history may have influenced Plato's thought. This is a new kind of history which will bring philosophy to life for all readers, including those coming to the subject for the first time.

Islamic Philosophy - Oliver Leaman 2013-05-03

Although Islamic philosophy represents one of

the leading philosophical traditions in the world, it has only recently begun to receive the attention it deserves in the non-Islamic world. This important text provides a concise and accessible introduction to the major movements, thinkers and concepts within that tradition, from the foundation of Islam to the present day. Ever since the growth of Islam as a religious and political movement, Muslim thinkers have sought to understand the theoretical aspects of their faith by using philosophical concepts. Leaman outlines this history and demonstrates that, although the development of Islamic philosophy is closely linked with Islam itself, its form is not essentially connected to any particular religion, and its leading ideas and arguments are of general philosophical significance. The author illustrates the importance of Islamic thought within philosophy through the use of many modern examples. He describes and contrasts the three main movements in Islamic philosophy ? Peripatetic,

Sufi and Illuminationist ? and examines the Persian as well as the Arabic traditions. Wide coverage is given to key aspects of Islamic philosophy, including epistemology, ontology, politics, ethics and philosophy of language, providing readers with a balanced view of the discipline. The second edition has been thoroughly revised and updated throughout, including the addition of two new chapters on recent debates surrounding Islam's need for an enlightenment, and on the future of Islamic philosophy. The new edition of Islamic Philosophy will continue to be essential reading for students and scholars of the subject, as well as anyone wanting to learn more about one of the most significant and influential philosophical traditions in the world today.

A History of Muslim Philosophy Volume 1, Book 1 - M. M. Sharif Sharif 2018-01-08

About four years ago I received a letter from Mr. S. M. Sharif, Educational Adviser to the Government of Pakistan and now Secretary in

the Ministry of Education, drawing my attention to the fact that there was no detailed History of Muslim Philosophy in the English language and inviting me to draw up a scheme for the preparation of such a History. The scheme prepared by me envisaged the collaboration of eighty scholars from all over the world. The blue-prints of the plan were placed by Mr. S. M. Sharif before the Government of Pakistan for approval and provision of funds. The Cabinet by a special ordinance deputed me to edit the History, and appointed a Committee consisting of the following to steer the scheme through:

Andalus and Sefarad - Sarah Stroumsa
2019-10-15

An integrative approach to Jewish and Muslim

philosophy in al-Andalus Al-Andalus, the Iberian territory ruled by Islam from the eighth to the fifteenth centuries, was home to a flourishing philosophical culture among Muslims and the Jews who lived in their midst. Andalusians spoke proudly of the region's excellence, and indeed it engendered celebrated thinkers such as Maimonides and Averroes. Sarah Stroumsa offers an integrative new approach to Jewish and Muslim philosophy in al-Andalus, where the cultural commonality of the Islamic world allowed scholars from diverse religious backgrounds to engage in the same philosophical pursuits. Stroumsa traces the development of philosophy in Muslim Iberia from its introduction to the region to the diverse forms it took over time, from Aristotelianism and Neoplatonism to rational theology and mystical philosophy. She sheds light on the way the politics of the day, including the struggles with the Christians to the north of the peninsula and the Fāṭimids in North Africa, influenced

philosophy in al-Andalus yet affected its development among the two religious communities in different ways. While acknowledging the dissimilar social status of Muslims and members of the religious minorities, Andalus and Sefarad highlights the common ground that united philosophers, providing new perspective on the development of philosophy in Islamic Spain.

Jewish and Islamic Philosophy - Lenn Evan

Goodman 1999

For centuries, Islamic and Jewish philosophies have blossomed side by side in a symbiosis that has produced some of the world's greatest thinkers and ideas. Lenn E. Goodman, focuses on a series of core issues common to the two intertwined philosophical traditions - freedom and determinism, the basis of ethical values, the relationship between faith and reason, the governance of God, the basis of friendship, and the meaning of history - to examine the rich and varied interactions of two traditions that have carried on a written conversation spanning the centuries. The object of Goodman's discussion is not to find the "sources" of religious ideas (as if to credit the philosophical originality of one tradition or cast aspersions on the philosophical dependency of another), but rather to explicate, connect, and demonstrate the commonalities of these two competing yet inextricably linked religious and philosophical traditions. It is sure

to become a key text for all students in religious studies, Jewish and Islamic studies, and philosophy.

The Oxford Handbook of Islamic Philosophy

- Khaled El-Rouayheb 2017

The study of Islamic philosophy has entered a new and exciting phase in the last few years. Both the received canon of Islamic philosophers and the narrative of the course of Islamic philosophy are in the process of being radically questioned and revised. Most twentieth-century Western scholarship on Arabic or Islamic philosophy has focused on the period from the ninth century to the twelfth. It is a measure of the transformation that is currently underway in the field that, unlike other reference works, the Oxford Handbook has striven to give roughly equal weight to every century, from the ninth to the twentieth. The Handbook is also unique in that its 30 chapters are work-centered rather than person- or theme-centered, in particular taking advantage of recent new editions and

translations that have renewed interest and debate around the Islamic philosophical canon. The Oxford Handbook of Islamic Philosophy gives both the advanced student and active scholar in Islamic philosophy, theology, and intellectual history, a strong sense of what a work in Islamic philosophy looks like and a deep view of the issues, concepts, and arguments that are at stake. Most importantly, it provides an up-to-date portrait of contemporary scholarship on Islamic philosophy.

History of Islamic Philosophy - Syyed Hossein Nasr 2015-11

Philosophy in the Islamic World: A Very Short Introduction Peter Adamson 2015-09-24

In the history of philosophy, few topics are so relevant to today's cultural and political

landscape as philosophy in the Islamic world. Yet, this remains one of the lesser-known philosophical traditions. In this Very Short Introduction, Peter Adamson explores the history of philosophy among Muslims, Jews, and Christians living in Islamic lands, from its historical background to thinkers in the twentieth century. Introducing the main philosophical themes of the Islamic world, Adamson integrates ideas from the Islamic and Abrahamic faiths to consider the broad philosophical questions that continue to invite debate: What is the relationship between reason and religious belief? What is the possibility of proving God's existence? What is the nature of knowledge? Drawing on the most recent research in the field, this book challenges the assumption of the cultural decline of philosophy and science in the Islamic world by demonstrating its rich heritage and overlap with other faiths and philosophies.

Islamic Philosophy from Its Origin to the Present
- Seyyed Hossein Nasr 2006-05-11

A comprehensive overview of the Islamic philosophical tradition. Islamic Philosophy from Its Origin to the Present offers a comprehensive overview of Islamic philosophy from the ninth century to the present day. As Seyyed Hossein Nasr attests, within this tradition, philosophizing is done in a world in which prophecy is the central reality of life—a reality related not only to the realms of action and ethics but also to the realm of knowledge. Comparisons with Jewish and Christian philosophies highlight the relation between reason and revelation, that is, philosophy and religion. Nasr presents Islamic philosophy in relation to the Islamic tradition as

a whole, but always treats this philosophy as philosophy, not simply as intellectual history. In addition to chapters dealing with the general historical development of Islamic philosophy, several chapters are devoted to later and mostly unknown philosophers. The work also pays particular attention to the Persian tradition. Nasr stresses that the Islamic tradition is a living tradition with significance for the contemporary Islamic world and its relationship with the West. In providing this seminal introduction to a tradition little-understood in the West, Nasr also shows readers that Islamic philosophy has much to offer the contemporary world as a whole. Seyyed Hossein Nasr is University Professor of Islamic Studies at The George Washington University. He is the author and editor of many books, including Islam: Religion, History, and Civilization.

The History of Philosophy in Islam by J. Boer
1903

Philosophy and Science in the Islamic World

A. Qadir 2013-05-08

The basis of Muslim philosophy and science is the instruction buried in the Quran. At an early date this tradition was enlarged and strengthened by the infiltration into Muslim culture of Greek philosophy and science through the translation of Greek classics by Muslims. The Indian tradition of thought also made its contribution to this intellectual leaven. This book traces the development and interaction of these strands in Muslim thinking. The author is concerned to show both how philosophy and science are related to specifically religious thought, and how they have made distinctive contributions to method and discovery. The impact of secularisation on the Muslim world puts these traditions under considerable strain, and it is interesting to define how far this pressure is a productive and fertile one. The current century has seen a Renaissance of Muslim science and philosophy; this book sets

the new achievements clearly against their historical background. First published in 1988. Islamic Philosophy - Majid Fakhry 2009-02-01 A comprehensive examination of the struggle to reconcile philosophy and Islam. From the introduction of Greek Philosophy into the Muslim world in the eighth century, right through to modern times, Majid Fakhry charts the evolution and interaction of philosophy, theology, and mysticism in the Islamic context. Highlighting key individuals, movements, concepts and writings, Fakhry also explores the conflicts and controversies between anti- and pro-philosophical parties that have characterised the development of Islamic thought. The book also features coverage of: the translation of ancient texts and their transmission to the Muslim world; the development of a systematic philosophy in Islam; theology, mysticism and the development of Sufism; Islam's interaction with western philosophy and theology; contemporary trends.

Philosophies of Islamic Education - Mujadad Zaman
2016-03-31

The study of Islamic education has hitherto remained a tangential inquiry in the broader focus of Islamic Studies. In the wake of this neglect, a renaissance of sorts has occurred in recent years, reconfiguring the importance of Islam's attitudes to knowledge, learning and education as paramount in the study and

appreciation of Islamic civilization. Philosophies of Islamic Education, stands in tandem to this call and takes a pioneering step in establishing the importance of its study for the educationalist, academic and student alike.

Broken into four sections, it deals with theological, pedagogic, institutional and contemporary issues reflecting the diverse and often competing notions and practices of Islamic education. As a unique international collaboration bringing into conversation theologians, historians, philosophers, teachers and sociologists of education Philosophies of Islamic Education intends to provide fresh means for conversing with contemporary debates in ethics, secularization theory, child psychology, multiculturalism, interfaith dialogue and moral education. In doing so, it hopes to offer an important and timely contribution to educational studies as well as give new insight for academia in terms of conceiving learning and education.

- Richard C. Taylor 2015-08-20

This valuable reference work synthesizes and elucidates traditional themes and issues in Islamic philosophy as well as prominent topics emerging from the last twenty years of scholarship. Written for a wide readership of students and scholars, *The Routledge Companion to Islamic Philosophy* is unique in including coverage of both perennial philosophical issues in an Islamic context and also distinct concerns that emerge from Islamic religious thought. This work constitutes a substantial affirmation that Islamic philosophy is an integral part of the Western philosophical tradition. •A contributing body that includes both widely respected scholars from around the world and a handful of the very best younger scholars
•"Reference" and "Further Reading" sections for each chapter and a comprehensive index for the whole volume
The result is a work that captures Islamic philosophy as philosophy. In this way it serves students and scholars of philosophy and religious studies and at the same time provides valuable essays relevant to the study of Islamic thought and theology.

The Formation of Post-Classical Philosophy in Islam - Frank Griffel 2021-06-08

Scholars have come to recognize the importance of classical Islamic philosophy both in its own right and in its preservation of and engagement with Greek philosophical ideas. At the same time, the period immediately following the so-called classical era has been considered a sort of dark age, in which Islamic thought entered a

long decline. In this monumental new work, Frank Griffel seeks to overturn this conventional wisdom, arguing that what he calls the "post-classical" period has been unjustly maligned and neglected by previous generations of scholars. *The Formation of Post-Classical Philosophy in Islam* is a comprehensive study of the far-reaching changes that led to a re-shaping of the philosophical discourse in Islam during the twelfth century. Earlier Western scholars thought that Islam's engagement with the tradition of Greek philosophy ended during that century. More recent analyses suggest that Islamic thinkers instead integrated Greek thought into the genre of rationalist Muslim theology (kal=am). Griffel argues that even this new view misses a key point. In addition to the integration of Greek ideas into kal=am, Muslim theologians picked up the discourse of classical philosophy in Islam (falsafa) and began to produce books in the tradition of Plato, Aristotle, and Avicenna a new and oft-misunderstood genre

they called ".hikma" in which they left aside theological concerns. They wrote in both genres, kal=am and .hikma, and the same writers argued for opposing teachings on the nature of God, the world's creation, and the afterlife depending on the genre in which they were writing. Griffel shows how careful attention to genre demonstrates both the coherence and ambiguity of this new philosophical approach. A work of extraordinary breadth and depth, *The Formation of Post-Classical Philosophy in Islam* offers a detailed, insightful history of philosophy in Iraq, Iran, and Central Asia during the twelfth century. It will be essential reading for anyone interested in the history of philosophy or the history of Islam.

History of Islamic Philosophy - I.M.N. Al-Jubouri 2004

Very occasionally a book appears which provides a perfect bridge between amateurs and professionals. This event is usually less likely to happen in the somewhat arcane field of

philosophy and almost beyond concept in the English speaking world when the subject is entwined with the history of Islam. The finer

points of philosophical issues are also discussed and presented to enable anyone, whether a scholar or not, Arabic or Westerner, to understand the truths these ancients sought.
