The Sculptures of Houdon -

H. Harvard Arnason 1975

Too Beautiful to Picture -

Elizabeth Mansfield 2007

Few tales of artistic triumph can rival the story of Zeuxis. As first reported by Cicero and Pliny, the painter Zeuxis set out to portray Helen of Troy, but when he realized that a single model could not match Helen's beauty, he combined the best features of five different models. A primer on mimesis in art making, the Zeuxis myth also illustrates

ambivalence about the ability to rely on nature as a model for ideal form. In *Too Beautiful to Picture*, Elizabeth C. Mansfield engages the visual arts, literature, and performance to examine the desire to make the ideal visible. She finds in the Zeuxis myth evidence of a cultural primal scene that manifests itself in gendered terms. Mansfield considers the many depictions of the legend during the Renaissance and questions its absence during the eighteenth century. Offering interpretations of Angelica Kauffman's paintings, Mary Shelley's *Frankenstein*, and Picasso's *Les Femmes d'Alger*, Mansfield also considers Orlan's carnal art as a profound retelling of the myth. Throughout, Mansfield asserts that the Zeuxis legend encodes an unconscious record of the West's reliance on mimetic representation as a vehicle for metaphysical solace. Elizabeth C. Mansfield is associate professor of art history at the University of the South.

The Story of Art - Ernst Hans Gombrich 1995

"The Story of Art is one of the most famous and popular books on art ever published. For 45 years it has remained unrivalled as an introduction to the whole subject, from the earliest cave paintings to the experimental art of today. Readers of all ages and backgrounds throughout the world have found in Professor Gombrich a true master, who combines knowledge and wisdom with a unique gift for communicating directly his own deep love of the works of art he describes." "The Story of Art owes its lasting popularity to the directness and simplicity of the writing, and also the author's skill in presenting a clear narrative. He describes his aim as 'to bring some intelligible order into the wealth of names, periods and styles which crowd the pages of more ambitious works', and using his insight into the psychology of the visual arts, he makes us see the history of

art as 'a continuous weaving and changing of traditions in which each work refers to the past and points to the future, a living chain that still links our own time with the Pyramid age'. In its new format, the 16th edition of this classic work is set to continue its triumphant progress for future generations and to remain the first choice for all newcomers to art."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. How Art Can Be Thought -

Allan deSouza 2018-11-09

What terms do we use to describe and evaluate art, and how do we judge if art is good, and if it is for the social good?

In How Art Can Be Thought

Allan deSouza investigates such questions and the popular terminology through which art is discussed, valued, and taught. Adapting art viewing to contemporary demands within a rapidly changing world, deSouza outlines how art functions as politicized culture within a global industry. In addition to offering new pedagogical strategies for MFA programs and the training of artists, he provides an extensive analytical glossary of some of the most common terms used to discuss art while focusing on their current and changing usage. He also shows how these terms may be crafted to new artistic and

social practices, particularly in what it means to decolonize the places of display and learning.

DeSouza's work will be invaluable to the casual gallery visitor and the arts professional alike, to all those who regularly look at, think about, and make art—especially art students and faculty, artists, art critics, and curators.

The Agency of Things in Medieval and Early Modern Art

- Grażyna Jurkowlaniec
2017-09-22

This volume explores the late medieval and early modern periods from the perspective of objects. While the agency of things has been studied in anthropology and archaeology, it is an innovative approach for art historical investigations. Each contributor takes as a point of departure active

things: objects that were collected, exchanged, held in hand, carried on a body, assembled, cared for or pawned. Through a series of case studies set in various geographic locations, this volume examines a rich variety of systems throughout Europe and beyond.

The Portable Edition of Janson's History of Art, Eighth Edition features four lightweight, paperback books packaged together along with optional access to a powerful student website, www.myartslab.com, making the text more student friendly than ever. Janson's History of Art is still available in the original hardcover edition and in Volume I and Volume II splits. The Portable Edition is comprised of four books, each representing a major period of art history: Long established as the classic and seminal introduction to art of the Western world, the Eighth Edition of Janson's History of Art is groundbreaking. When Harry Abrams first published the History of Art in 1962, John F. Kennedy occupied the White House, and Andy Warhol was an emerging artist. Janson offered his readers a strong focus on Western art, an important consideration of technique and style, and a

clear point of view. The History of Art, said Janson, was not just a stringing together of historically significant objects, but the writing of a story about their interconnections, a history of styles and of stylistic change. Janson's text focused on the visual and technical characteristics of the objects he discussed, often in extraordinarily eloquent language. Janson's History of Art helped to establish the canon of art history for many generations of scholars. The new Eighth Edition, although revised to remain current with new discoveries and scholarship, continues to follow Janson's lead in important ways: It is limited to the Western tradition, with a chapter on Islamic art and its relationship to Western art. It keeps the focus of the discussion on the object, its manufacture, and its visual character. It considers the contribution of the artist as an important part of the analysis. This edition maintains an organization along the lines established by Janson, with

separate chapters on the Northern European Renaissance, the Italian Renaissance, the High Renaissance, and Baroque art, with stylistic divisions for key periods of the modern era. Also embedded in this edition is the narrative of how art has changed over time in the cultures that Europe has claimed as its patrimony.

Afro-Atlantic Histories -

Adriano Pedrosa 2021-10

A colossal, panoramic, much-needed appraisal of the visual cultures of Afro-Atlantic territories across six centuries Afro-Atlantic Histories brings together a selection of more than 400 works and documents by more than 200 artists from the 16th to the 21st centuries that express and analyze the ebbs and flows between Africa, the Americas, the Caribbean and Europe. The book is motivated by the desire and need to draw parallels, frictions and dialogues around the visual cultures of Afro-Atlantic territories--their experiences, creations, worshipping and philosophy.

The so-called Black Atlantic, to use the term coined by Paul Gilroy, is geography lacking precise borders, a fluid field where African experiences invade and occupy other nations, territories and cultures. The plural and polyphonic quality of "histórias" is also of note; unlike the English "histories," the word in Portuguese carries a double meaning that encompasses both fiction and nonfiction, personal, political, economic and cultural, as well as mythological narratives. The book features more than 400 works from Africa, the Americas and the Caribbean, as well as Europe, from the 16th to the 21st century. These are organized in eight thematic groupings: Maps and Margins; Emancipations; Everyday Lives; Rites and Rhythms; Routes and Trances; Portraits; Afro Atlantic Modernisms; Resistances and Activism. Artists include: Nina Chanel Abney, Emma Amos, Benny Andrews, Emanuel Araujo, Maria Auxiliadora, Romare Bearden, John Biggers, Paul

Cézanne, Victoria Santa Cruz, Beauford Delaney, Aaron Douglas, Melvin Edwards, Ibrahim El-Salahi, Ben Enwonwu, Ellen Gallagher, Theodore Géricault, Barkley Hendricks, William Henry Jones, Lois Mailou Jones, Titus Kaphar, Wifredo Lam, Norman Lewis, Ibrahim Mahama, Edna Manley, Archibald Motley, Abdias Nascimento, Gilberto de la Nuez, Toyin Ojih Odutola, Dalton Paula, Rosana Paulino, Howardena Pindell, Heitor dos Prazeres, Joshua Reynolds, Faith Ringgold, Gerard Sekoto, Alma Thomas, Hank Willis Thomas, Rubem Valentim, Kara Walker and Lynette Yiadom-Boakye.

Germany - Dietrich Orlow

Data Feminism - Catherine D'Ignazio 2020-03-31

A new way of thinking about data science and data ethics that is informed by the ideas of intersectional feminism. Today, data science is a form of power. It has been used to

expose injustice, improve health outcomes, and topple governments. But it has also been used to discriminate, police, and surveil. This potential for good, on the one hand, and harm, on the other, makes it essential to ask: Data science by whom? Data science for whom? Data science with whose interests in mind? The narratives around big data and data science are overwhelmingly white, male, and techno-heroic. In *Data Feminism*, Catherine D'Ignazio and Lauren Klein present a new way of thinking about data science and data ethics—one that is informed by intersectional feminist thought. Illustrating data feminism in action, D'Ignazio and Klein show how challenges to the male/female binary can help challenge other hierarchical (and empirically wrong) classification systems. They explain how, for example, an understanding of emotion can expand our ideas about effective data visualization, and how the concept of invisible labor can expose the significant

human efforts required by our automated systems. And they show why the data never, ever “speak for themselves.” Data Feminism offers strategies for data scientists seeking to learn how feminism can help them work toward justice, and for feminists who want to focus their efforts on the growing field of data science. But Data Feminism is about much more than gender. It is about power, about who has it and who doesn't, and about how those differentials of power can be challenged and changed.
