Physics Exam-builder for HKDSE - Y. M. Yeung 2017-02-03

The second edition of this book series "Physics Exam-Builder for HKDSE" is written in accordance with the amended NSS physics curriculum guidelines for 2016 HKDSE and onwards. Book 2 covers the topics of Mechanics, which lays the foundation of physics and the concepts are also used in other sections of the syllabus. Moreover, this section carries a significant weight in the HKDSE examination. It takes time for students to grasp the concepts and master the necessary skills in solving problems. Some examination questions on this section cover integrated topics and require candidates' ability to comprehend an unfamiliar situation and to apply suitable knowledge in solving problems. In this book, although topics are grouped clearly in different chapters, some questions in a later chapter require application of knowledge learned in previous chapters. This will help candidates to consolidate their knowledge and to build up their confidence in tackling problems demanding higher order skills.

Language Across the Curriculum & CLIL in English as an Additional Language (EAL) - ~~Context~~ M.Y. Lin 2016-09-15

This book will be of interest to a broad readership, regardless of whether they have a background in sociolinguistics, functional linguistics or genre theories. It presents an accessible "meta-language" (i.e. a language for talking about language) that is workable and usable for teachers and researchers from both language and content backgrounds, thus facilitating collaboration across content and language subject panels. Chapters 1 to 3 lay the theoretical foundation of this common meta-language by critically reviewing, systematically presenting and integrating key theoretical resources for teachers and researchers in this field. In turn, Chapters 4 to 7 focus on issues in pedagogy and assessment, and on school-based approaches to LAC and CLIL, drawing on both research studies and the experiences of front-line teachers and school administrators. Chapter 8 provides a critical and reflexive angle on the field by asking difficult questions regarding how LAC and CLIL are often situated in contexts characterized by inequality of access to the linguistic and cultural capitals, where the local languages of the students are usually neglected or viewed unfavourably in relation to the L2 in mainstream society, and where teachers are usually positioned as recipients of knowledge rather than makers of knowledge. In closing, Chapter 9 reviews the state of the art in the field and proposes directions for future inquiry.

A Precarious Game - Ergin Bulut 2020-03-15

A Precarious Game is an ethnographic examination of video game production. The developers that Ergin Bulut researched for almost three years in a medium-sized studio in the U.S. loved making video games that millions play. Only some, however, can enjoy this dream job, which can be precarious and alienating for many others. That is, the passion of a predominantly white-male labor force relies on material inequalities involving the sacrificial labor of their families, unacknowledged work of precarious testers, and thousands of racialized and gendered workers in the Global South. A Precarious Game explores the politics of doing

what one loves. In the context of work, passion and love imply freedom, participation, and choice, but in fact they accelerate self-exploitation and can impose emotional toxicity on other workers by forcing them to work endless hours. Bulut argues that such ludic discourses in the game industry disguise the racialized and gendered inequalities on which a profitable transnational industry thrives. Within capitalism, work is not just an economic matter, and the political nature of employment and love can still be undemocratic even when based on mutual consent. As Bulut demonstrates, rather than considering work simply as a matter of economics based on trade-offs in the workplace, we should consider the question of work and love as one of democracy rooted in politics.

Sweetness and Light - Hattie Ellis 2010-04-28

Did you know that Abraham Lincoln and Muhammad Ali both consumed bee pollen to boost energy, or that beekeepers in nineteenth-century Europe viewed their bees as part of the family? Or that after man, the honeybee, *Apis mellifera*, is the most studied creature on the planet? And that throughout history, honey has been highly valued by the ancient Egyptians (the first known beekeepers), the Greeks, and European monarchs, as well as Winnie the Pooh? In *Sweetness and Light*, Hattie Ellis leads us into the hive, revealing the fascinating story of bees and honey from the Stone Age to the present, from Nepalese honey hunters to urban hives on the rooftops of New York City. Uncovering the secrets of the honeybee one by one, Ellis shows how this small insect, with a collective significance so much greater than its individual size, can carry us through past and present to tell us more about ourselves than any other living creature.

Interactive Language Teaching Wilga M. Rivers 1987-02-27

In this collection of essays, a distinguished group of innovative teachers and writers describe the approaches and techniques they have incorporated into their own teaching. The articles are designed to help classroom teachers make language classes more participatory and communication oriented. Successive articles deal with the structure of interaction in large and small groups: imaginative activities for listening, speaking, reading, writing, and testing; the use of poetry, song, and drama; how to perform grammar rules rather than recite them; the special contribution of authentic materials; using audio and video as well as computer software to enhance learning, tapping the community as a resource; learning to interact in different cultural styles; and preparing the student for real-life professional use of language. Teachers of any language and teachers in training will find in this volume a wealth of original and practical ideas for the classroom.

Table for One - Industry Council for Packaging and the Environment 2009

Food and the City in Europe since 1800 Peter Lummel 2012-11-28

This fascinating volume examines the impact that rapid urbanization has had upon diets and food systems

throughout Western Europe over the past two centuries. Bringing together studies from across the continent, it stresses the fundamental links between key changes in European social history and food systems, food cultures and food politics. Contributors respond to a number of important questions, including: when and how did local food production cease to be sufficient for the city and when did improved transport conditions and liberal commercial relations replace local by supra-regional food supplies? How far did the food industry contribute to improved living conditions in cities? What influence did urban consumers have? Food and the City in Europe since 1800 also examines issues of food hygiene and health impacts in cities, looks at various food innovations and how 'new' foods often first gained acceptance in cities, and explores how eating fashions have changed over the centuries.

Public Examinations Examined - Thomas Kellaghan 2019-11-19

High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. "This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as 'the diploma disease' takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog." Angela W. Little, Professor Emerita, Institute of Education, University College London

"This book is very well structured and written and draws on the authors' remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings.†? Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning "I am sure that Public Examinations Examined, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations.†? Victor Bolotov, Distinguished Professor, Higher School of Economics, National Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation

Testing English as a Second Language - David P. Harris 1974

Second Language Pronunciation Assessment - Talia Isaacs 2016-12-22

This book is open access under a CC BY licence. It spans the areas of assessment, second language acquisition (SLA) and pronunciation and examines topical issues and challenges that relate to formal and informal assessments of second language (L2) speech in classroom, research and real-world contexts. It showcases insights from assessing other skills (e.g. listening and writing) and highlights perspectives from research in speech sciences, SLA, psycholinguistics and sociolinguistics, including lingua franca communication, with concrete implications for pronunciation assessment. This collection will help to establish commonalities across research areas and facilitate greater consensus about key issues, terminology and best practice in L2 pronunciation research and assessment. Due to its interdisciplinary nature, this book will appeal to a mixed audience of researchers, graduate students, teacher-educators and exam board staff with varying levels of expertise in pronunciation and assessment and wide-ranging interests in applied linguistics.

Science Education in East Asia - Myint Swe Khine 2015-09-03

This book presents innovations in teaching and learning science, novel approaches to science curriculum, cultural and contextual factors in promoting science education and improving the standard and achievement of students in East Asian countries. The authors in this book discuss education reform and science curriculum changes and promotion of science and STEM education, parental roles and involvement in children's education, teacher preparation and professional development and research in science education in the context of international benchmarking tests to measure the knowledge of mathematics and science such as the Trends in Mathematics and Science Study (TIMSS) and achievement in science, mathematics and reading like Programme for International Student Assessment (PISA). Among the high achieving countries, the performance of the students in East Asian countries such as Singapore, Taiwan, Korea, Japan, Hong Kong and China (Shanghai) are notable. This book investigates the reasons why students from East Asian countries consistently claim the top places in each and every cycle of those study. It brings together prominent science educators and researchers from East Asia to share their experience and findings, reflection and vision on emerging trends, pedagogical innovations and research-informed practices in science education in the region. It provides insights into effective educational strategies and development of science education to international readers.

Examination Standards - Jo-Anne Baird 2018-09-10

An international team of authorities in the field of standard setting discuss what standard setting is and should be. Their accounts of a representative selection of jurisdictions (Chile, England, France, Georgia, Ireland, Queensland, South Africa, Sweden, and the United States) are accompanied by lively critical commentaries from other experts in this domain. Together, the editors challenge the notion that there is a single superior way of thinking about national examinations, and instead encourage educators and policymakers to engage with the multiple perspectives offered here, and to consider carefully the complex issues raised.

He'll Be OK - Celia Lashlie 2015-09-01

PARENTING CLASSIC How do you raise boys to men in a world where trouble beckons at every turn? How do you make sure they learn the 'right' lessons, stay out of danger, find a path to follow? How do you ensure they'll be OK? Celia Lashlie has some of the answers. After years working in the prison service, she knows what can happen when boys make the wrong choices. She also knows what it's like to be a parent - she raised a son on her own and feared for his survival. As a crucial part of the Good Man Project, she talked to 180 classes of boys. Her insights into what boys need - and what parents can do to help them - are groundbreaking. In this new edition of her honest, no-nonsense and best-selling book, Celia reveals what goes on inside the world of boys. With clarity and insight, she offers parents - especially mothers - practical and reassuring advice on raising their boys to become good, loving, articulate men. "Celia did an enormous amount of work, particularly standing up for at risk young people, and she made an enormous contribution." - New Zealand Prime Minister John Key

Developing and Validating Test Items - Thomas M. Haladyna 2013-07-18

Since test items are the building blocks of any test, learning how to develop and validate test items has always been critical to the teaching-learning process. As they grow in importance and use, testing programs increasingly supplement the use of selected-response (multiple-choice) items with constructed-response formats. This trend is expected to continue. As a result, a new item writing book is needed, one that provides comprehensive coverage of both types of items and of the validity theory underlying them. This book is an outgrowth of the author's previous book, *Developing and Validating Multiple-Choice Test Items*, 3e (Haladyna, 2004). That book achieved distinction as the leading source of guidance on creating and validating selected-response test items. Like its predecessor, the content of this new book is based on both an extensive review of the literature and on its author's long experience in the testing field. It is very timely in this era of burgeoning testing programs, especially when these items are delivered in a computer-based environment. Key features include ... Comprehensive and Flexible - No other book so thoroughly covers the field of test item development and its various applications. Focus on Validity - Validity, the most important consideration in testing, is stressed throughout and is based on the Standards for Educational and Psychological Testing, currently under revision by AERA, APA, and NCME Illustrative Examples - The book presents various selected and constructed response formats and uses many examples to illustrate correct and incorrect ways of writing items. Strategies for training item writers and developing large numbers of items using algorithms and other item-generating methods are also presented. Based on Theory and Research - A comprehensive review and synthesis of existing research runs throughout the book and complements the expertise of its authors.
