Alcohol is also a drug of dependence. Some individuals will drink too much and some of them will become addicted. Access to alcohol, binge drinking, and younger drinkers can lead to unsafe workplaces, absenteeism, fraud and criminal behaviour. Alcohol at Work is a definitive guide to the problem, exploring its nature and scale and providing a complete range of ideas and techniques to help create a policy in the workplace and develop appropriate and effective measures for monitoring and tackling alcohol abuse. The key collective message is solve the problem - take the alcohol, not the person, out of the workplace. The drug free workplace initiative was started in 1986 by President Ronald Reagan when he issued an executive order to develop guidelines for drug abuse testing for Federal Government employees. Since then, most state, government, and private employers have adopted the policy of a drug free workplace. Today, pre-employment drug testing is almost mandatory and passing the drug test is a condition for hire. A Health Educator's Guide to Understanding Drug Abuse Testing describes in layman's language the process of testing for drugs and provides coverage of what potential employees are being tested for, how the tests are performed, and what foods and drugs may affect the test results and may jeopardize a person's chance of being hired. Why Do So Many Incompetent Men Become Leaders? - Tomas Chamorro-Premuzic 2019-02-19

Look around your office. Turn on the TV. Incompetent leadership is everywhere, and there's no denying that most of these leaders are men. In this timely and provocative book, Tomas Chamorro-Premuzic asks two powerful questions: Why is it so easy for incompetent men to become leaders? And why is it so hard for competent people--especially competent women--to advance? Marshaling decades of rigorous research, Chamorro-Premuzic points out that although men make up a majority of leaders, they underperform when compared with female leaders. In fact, most organizations equate leadership potential with a handful of destructive personality traits, like overconfidence and narcissism. In other words, these traits may help someone get selected for a leadership role, but they backfire once the person has the job. When competent women--and men who don't fit the stereotype--are unfairly overlooked, we all suffer the consequences. The result is a deeply flawed system that rewards arrogance rather than humility, and loudness rather than wisdom. There is a better way. With clarity and verve, Chamorro-Premuzic shows us what it really takes to lead and how new systems and processes can help us put the right people in charge.

Fairness in Employment Testing - Committee on the General Aptitude Test Battery 1989-01-15

Declining American competitiveness in world economic markets has renewed interest in employment testing as a way of putting the right workers in the right jobs. A new study of the U.S. Department of Labor's General Aptitude Test Battery (GATB) Referral System sheds light on key questions for America's employers: How well does the GATB predict job success? Are there scientific justifications for adjusting minority test scores? Will increased use of the GATB result in substantial increases in productivity? Fairness in Employment Testing evaluates both the validity generalization techniques used to justify the use of the GATB across the spectrum of U.S. jobs and the policy of adjusting test scores to promote equal opportunity.
