A First Course in Probability - Sheldon M. Ross 2002

This market-leading introduction to probability features exceptionally clear explanations of the mathematics of probability theory and explores its many diverse applications through numerous interesting and motivational examples. The outstanding problem sets are a hallmark feature of this book. Provides clear, complete explanations to fully explain mathematical concepts. Features subsections on the probabilistic method and the

maximum-minimums identity. Includes many new examples relating to DNA matching, utility, finance, and applications of the probabilistic method. Features an intuitive treatment of probability—intuitive explanations follow many examples. The Probability Models Disk included with each copy of the book, contains six probability models that are referenced in the book and allow readers to quickly and easily perform calculations and simulations.

Understanding Creation - L. James Gibson 2011-01
Understanding Creation articulates twenty questions about faith and science that Christians often encounter. The co-editors have assembled an international group of experienced scientists, researchers, and thinkers who provide thoughtful answers to these questions. They all share several convictions: the biblical record is an essential component of Christian doctrine; Christian faith and empirical science can work

fruitfully together; and our comprehension of truth is progressive.

Book of 2017 A Vulture Best YA

Book of 2017 A Buzzfeed Best

YA Book of 2017 An ode to Put

the Damn Guns Down, this is

New York Times bestselling

author Jason Reynolds’s

electrifying novel that takes

place in sixty potent

seconds—the time it takes a kid

to decide whether or not he’s

going to murder the guy who

killed his brother. A cannon. A

strap. A piece. A biscuit. A

burner. A heater. A chopper. A

gat. A hammer A tool for RULE

Or, you can call it a gun. That’s

what fifteen-year-old Will has

shoved in the back waistband

of his jeans. See, his brother

Shawn was just murdered. And

Will knows the rules. No

crying. No snitching. Revenge.

That’s where Will’s now

heading, with that gun shoved

in the back waistband of his

jeans, the gun that was his

brother’s gun. He gets on the

elevator, seventh floor, stoked.

He knows who he’s after. Or

does he? As the elevator stops

on the sixth floor, on comes

Buck. Buck, Will finds out, is

who gave Shawn the gun before Will took the gun. Buck tells Will to check that the gun is even loaded. And that's when Will sees that one bullet is missing. And the only one who could have fired Shawn's gun was Shawn. Huh. Will didn't know that Shawn had ever actually USED his gun. Bigger huh. BUCK IS DEAD. But Buck's in the elevator? Just as Will's trying to think this through, the door to the next floor opens. A teenage girl gets on, waves away the smoke from Dead Buck's cigarette. Will doesn't know her, but she knew him. Knew. When they were eight. And stray bullets had cut through the playground, and Will had tried to cover her, but she was hit anyway, and so what she wants to know, on that fifth floor elevator stop, is, what if Will, Will with the gun shoved in the back waistband of his jeans, MISSES. And so it goes, the whole long way down, as the elevator stops on each floor, and at each stop someone connected to his brother gets on to give Will a piece to a bigger story than the

one he thinks he knows. A story that might never know an END...if Will gets off that elevator. Told in short, fierce staccato narrative verse, Long Way Down is a fast and furious, dazzlingly brilliant look at teenage gun violence, as could only be told by Jason Reynolds. Life of Pi - Yann Martel
2022-01-27

"Life of Pi will make you believe in the power of theatre" (Times). After a cargo ship sinks in the middle of the vast Pacific Ocean, there are five survivors stranded on a lifeboat - a hyena, a zebra, an orangutan, a Royal Bengal tiger, and a sixteen year-old boy named Pi. Time is against them, nature is harsh, who will survive? Based on one of the most extraordinary and best-loved works of fiction - winner of the Man Booker Prize, selling over fifteen million copies worldwide - and featuring breath-taking puppetry and state-of-the-art visuals, Life of Pi is a universally acclaimed, smash hit adaptation of an epic journey of endurance and hope. Adapted by acclaimed playwright Lolita Chakrabarti,

this edition was published to coincide with the West End premiere in November 2021. [Catalog of Copyright Entries. Third Series](#) - Library of Congress. Copyright Office 1957

Better Book Reports Gr. 7-8 "Aligned to Common Core Standards" - Summers, Eleanor Aligned to Common Core! This resource contains six sections: Vocabulary Development, Identifying Important Information, Character Analysis, Summarizing & Sequencing Events, Reasoning & Critical Thinking, and Creativity & Design. Each section begins with a Teacher's Notes page that will provide suggestions to help you to introduce the sections and to obtain the best results from your students. Students in the Intermediate Division have more sophisticated reading skills and require purposeful and challenging activities that will promote successful and enjoyable reading experiences. Book reports allow the young readers to share their thoughts about the stories they have

heard or have read themselves. As well, students need the opportunity to demonstrate their understanding of the materials.

Spectrum Language Arts, Grade 8 - 2014-08-15

An understanding of language arts concepts is key to strong communication skills—the foundation of success across disciplines. Spectrum Language Arts for grade 8 provides focused practice and creative activities to help your child master sentence types, grammar, parts of speech, and vocabulary. This comprehensive workbook doesn't stop with focused practice—it encourages children to explore their creative sides by challenging them with thought-provoking writing projects. Aligned to current state standards, Spectrum Language Arts for grade 8 includes an answer key and a supplemental Writer's Guide to reinforce grammar and language arts concepts. With the help of Spectrum, your child will build the language arts skills necessary for a

lifetime of success.

Mathematics for Machine Learning - Marc Peter
Deisenroth 2020-04-23

The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support

vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding. Programming tutorials are offered on the book's web site.

Nineteen Eighty-Four - George Orwell 2021-01-09

"Nineteen Eighty-Four: A Novel", often published as "1984", is a dystopian social science fiction novel by English novelist George Orwell. It was published on 8 June 1949 by Secker & Warburg as Orwell's ninth and final book completed in his lifetime. Thematically, "Nineteen Eighty-Four" centres on the consequences of totalitarianism, mass surveillance, and repressive regimentation of persons and behaviours within society. Orwell, himself a democratic

socialist, modelled the authoritarian government in the novel after Stalinist Russia. More broadly, the novel examines the role of truth and facts within politics and the ways in which they are manipulated. The story takes place in an imagined future, the year 1984, when much of the world has fallen victim to perpetual war, omnipresent government surveillance, historical negationism, and propaganda. Great Britain, known as Airstrip One, has become a province of a totalitarian superstate named Oceania that is ruled by the Party who employ the Thought Police to persecute individuality and independent thinking. Big Brother, the leader of the Party, enjoys an intense cult of personality despite the fact that he may not even exist. The protagonist, Winston Smith, is a diligent and skillful rank-and-file worker and Outer Party member who secretly hates the Party and dreams of rebellion. He enters into a forbidden relationship with a colleague,

Julia, and starts to remember
what life was like before the
Party came to power.
