Political Reform In Francophone Africa - John F Clark 2018-02-07

Most African states experienced only a few fleeting years of democratic rule after independence before succumbing to authoritarianism. During the 1970s and 1980s, Africans and Westerners alike came to view dictatorship to be as much a part of the region's social landscape as its grinding poverty. Yet the end of the Cold War and the sharpening of the economic crisis at the end of the 1980s have breathed new life into campaigns for democracy in Africa, shaking the foundations of many long-standing autocracies. In some cases, dramatic transitions took place, though the fate of the new democracies is far from certain. This volume explores the origins and evolution of political reform movements in several states of francophone Africa. The authors first make the case for the distinctiveness of francophone Africa, based on the influences of colonial history, language, and France's contemporary role in Africa, then survey the challenges of reform, including the problems of transition from authoritarianism and consolidation of democratic regimes. Case studies of thirteen former French and Belgian colonies follow, organized by level of reform achieved: peaceful regime change, incremental reforms, repressed reform efforts, and reform in the midst of war.

Routledge Handbook of the Contemporary Philippines - Mark R. Thompson 2018-02-19

The Philippines is a fascinating example of a "poor country democracy" where issues of economic development and poverty, political participation and stability, as well as ethnicity and migration are crucial. The Routledge Handbook of the Contemporary Philippines provides a comprehensive overview of the current political, economic, social, and cultural issues of the country. The Handbook is divided into the following four sections concentrating on a different aspect of the Philippines: domestic politics; foreign relations; economics and social policy; cultures and movements. In terms of domestic politics, chapters discuss clientelism, bossism, dynasties, pork barrel and corruption as well as institutions - the presidency, congress, the judiciary, the civil service, political parties, and civilian-military relations. The Philippines is confronted with many overseas challenges, with the foreign relations section focused on the country's relationship with China, Japan, and the USA as well as assessing the impact of the Filipino diaspora community around the world. Regarding economics and social policy, authors examine industrial policy, capital flight, microfinance, technocracy, economic nationalism, poverty, social welfare programs, and livelihoods. The final section on Philippine cultures and movements highlights issues of customs, gender, religion, and nationalism while also examining various social and political forces - the peasantry, the middle class, indigenous peoples, NGOs, the left, trade unionism, the women's movement, and major insurgencies. Written by leading experts in the field, the Handbook provides students, scholars, and policymakers of Southeast Asia with an interdisciplinary resource on the evolving politics, society, and economics of the Philippines.

Paradigms and Theories Influencing Policies in the South African

and International Water Sectors - Richard Meissner 2016-11-12

This book presents a new way of looking at and analyzing policies, programs and/or plans in which research scientists have used their knowledge to develop mechanisms such as South Africa's National Water Resource Strategy, Second Edition; Australian and South African climate change adaptation strategies for government entities and the UNDP's Water and Ocean Governance focus area. It critically assesses how science can be used in the service of society and how researchers and practitioners can bridge the gaps that arise as a result of incomplete thinking. Presenting a bird's-eye view of how thinking and understanding operate in the policy context, it offers a valuable contribution to fields of inquiry such as research methods, comparative analyses, political science, international relations and the natural and social sciences in general. This book fills a market gap, providing real-world solutions to the practical application of science, paradigms and theories.

Developmental Change - Allan A. Spitz 2014-07-15

Developmental change and the related problems of modernization have attracted the attention of scholars in many disciplines. In this bibliography -- derived and expanded from an earlier compilation by Mr. Spitz and Edward Weidner -- the author orders and annotates nearly 2,500 articles appearing between 1945 and 1969 in 234 journals from 25 countries. Organized by subject and indexed by both author and journal, the citations include studies of social problems, economic factors, political questions, public administration, and international cooperation and assistance. Special emphasis has been given to new and little-known sources. In addition, a selected bibliography of monographs and book-length studies dealing with the modernization of underdeveloped countries and areas is included in the volume.

Africa's Second Wave of Freedom Lyn S. Graybill 1998

Africa's Second Wave of Freedom represents the work of scholars who share a concern with the development of civil society in Africa. The first third of the book deals theoretically with the issues of democracy and stability in Africa. In particular, the contributors analyze the inadequacy of the United States' response to African problems (such as environmental decay, spiraling debt, and health epidemics) that do not respect national boundaries; the fragility of democracy in Africa and the danger of reversion to dictatorships; and the barriers to constitutional democracy in sub-Saharan Africa. The remainder of the book consists of case studies of various aspects of civil society from Mozambique, Nigeria, Zimbabwe, and South Africa.

The African-Asian Divide - Paul Vandenberg 2013-09-13

Why have Africans not gained a more dominant position in urban manufacturing in Kenya? This question is explored through an analysis of the institutions, both formal and informal, that have affected patterns of capital accumulation in Kenya by the African and Asian (Indian) communities. Using a new institutional economics approach, this book explores the history of economic activity through the pre-colonial, colonial and post-colonial periods, including the transformative period of British rule. During the colonial period, Asians were brought in to build the railways and subsequently focused on urban-based activities. Africans, meanwhile, found it difficult to move out of agriculture. Thus, the ethnic-sectoral division of activities was entrenched by the formal laws and powers of the British. Following independence, the network and financial capital that Asians had built up allowed them to survive early attempts at the Africanization of industry. Africans, now supported by the formal institutions of the state, still found it difficult to engage in manufacturing because they lacked the informal networks that support trade and credit. The analysis is supported by the results of a contemporary survey of 120 manufacturing firms in Nairobi's metal sector that highlight the division between smaller African firms and larger Asian ones.

The Political Economy of Development and Underdevelopment in Africa - Toyin Falola 2013-06-07

While Africa is too often regarded as lying on the periphery of the global political arena, this is not the case. African nations have played an important historical role in world affairs. It is with this understanding

that the authors in this volume set out upon researching and writing their chapters, making an important collective contribution to our understanding of modern Africa. Taken as a whole, the chapters represent the range of research in African development, and fully tie this development to the global political economy. African nations play significant roles in world politics, both as nations influenced by the ebbs and flows of the global economy and by the international political system, but also as actors, directly influencing politics and economics. It is only through an understanding of both the history and present place of Africa in global affairs that we can begin to assess the way forward for future development.

Women, States and Nationalism - Sita Ranchod-Nilsson 2003-09-02

Women, States and Nationalism counters this attitude and examines the many and contradictory ways in which women negotiate their places in 'the nation'. The volume includes theoretical essays that explore the multiple ways in which the very concept of 'nation' is based upon notions of family, sexuality and gender power which are often overlooked or downplayed by 'male-stream' scholarship. It gathers together an outstanding panel of feminist scholars and area studies specialists, who, through a series of focused case studies, analyse diverse issues which include; *gender and sectarian conflict in Northern Ireland *the paradox of Israeli women soldiers *women, civic duty and the military in the USA *the Hindu Right in India *power, agency and representation in Zimbabwe *political identity and heterosexism. This timely volume is a highly valuable resource for students and scholars of Nationalism, Internationalism Studies and Women's Studies.

Peace and Security in Indo-Pacific Asia - Sorpong Peou 2021-11-11

Peace and Security in Indo-Pacific Asia is for the informed, the interested, and the engaged. Sorpong Peou brings together the skills of the pedagogue with the knowledge of the scholar. -Dr. David Dewitt, University Professor Emeritus, Senior Scholar, York University, Toronto, Canada. Peou's excellent book provides both the lay reader and the specialist with six important theoretical frameworks which should provide the basis for better appreciation of what a security community in Indo-Pacific Asia means in our world today. There are very few scholars who understand the region like Peou. -Dr. W. Andy Knight, Professor of Political Science, the University of Alberta, Canada. Sorpong Peou's extraordinary breadth of knowledge, of both International Relations theory and the key trends in Indo-Pacific Asia, shines through in this authoritative analysis. -Dr. Richard Stubbs, Professor of Political Science, McMaster University, Canada. A pedagogical approach of the textbook that is appreciated is how the author respectfully engages with the theories of IR and is not pushing an agenda of denouncing some theories and trying to persuade the reader of others. We live in such polarizing times that it is truly refreshing to read scholarly work that avoids sensationalistic attacks on theories that have been debated for decades. Each theory in this manuscript is explored on its own terms, and the reader is encouraged to figure out where they stand on these enduring debates in the context of Indo-Pacific security. The approach will lead to compelling classroom discussions of the theories and the politics of the region. This book is a must-read for any student or observer of security trends in the region. -Dr. Mark Williams, Chair and Professor of Political Studies, Vancouver Island University, B.C., Canada.

2012-11-12

This volume brings together a multiplicity of voices--both theoretical and practical--on the complex politics, challenges, and strategies of educating students--in North America and worldwide--who are speakers of diverse or nonstandard varieties of English, creoles, and hybrid varieties of English, such as African American Vernacular English, Caribbean Creole English, Tex Mex, West African Pidgin English, and Indian English, among others. Pedagogical features: Key points at the beginning of each chapter help focus the reader and provide a framework for reading, writing, reflection, and discussion; chapter-end questions for discussion and reflective writing engage and challenge the ideas presented and encourage a range of approaches in dealing with language diversity. Collectively, the chapters in this volume invite educators, researchers, and students, across the fields of TESOL, applied linguistics, sociolinguistics, English, literacy, and language education, to begin to consider and adopt context-specific policies and practices that will improve the language development and academic performance of linguistically diverse students.

India and China in Africa - Raj Verma 2016-12-19

With their phenomenal growth rates, India and China are surging ahead as world economic powers. Due to increasing instability in the Middle East, they have turned to Africa to procure oil to fuel their industrialisation process. Africa's economy stands to be impacted in various ways due to the increasing interaction with these 'Asian Giants'. This book analyses the acquisition of oil blocks by Indian and Chinese oil corporations in eleven West African countries. It describes the differences in how India and China mobilise oil externally to meet their respective goals and objectives. The book examines the rate of return on capital, rate of interest on loans and the ease of availability of loans, the difference in the level of technology and ability to acquire technology, project management skills, risk aversion, valuation of the asset and the difference in the economic, political and diplomatic support received by the Chinese and Indian oil companies from their respective governments. It is argued that the difference in the relative economic and political power of India and China accounts for the ability of Chinese oil companies to outbid their Indian competitors and/or be preferred as partners by international oil companies. Containing interviews from Indian and Chinese oil company executives, government officials, industry officials, former diplomats and scholars and academics from India, China and the UK, this book makes a valuable contribution to existing literature on India, China and the oil industry in West Africa. It will be a valuable resource for academics in the field of International Relations, Foreign Policy Analysis, Asian Business and Economics.

Africa in Global International Relations - Paul-Henri Bischoff
2015-10-05

Recent scholarship in International Relations (IR) has started to study the meaning and implications of a non-Western world. With this comes the need for a new paradigm of IR theory that is more global, open, inclusive, and able to capture the voices and experiences of both Western and non-Western worlds. This book investigates why Africa has been marginalised in IR discipline and theory and how this issue can be addressed in the context of the emerging Global IR paradigm. To have relevance for Africa, a new IR theory needs to be more inclusive, intellectually negotiated and holistically steeped in the African context. In this innovative volume, each author takes a critical look at existing IR

paradigms and offers a unique perspective based on the African experience. Following on from Amitav Acharya and Barry Buzan's work, Non-Western International Relations Theory, it develops and advances non-Western IR theory and the idea of Global IR. This volume will be of key interest to scholars and students of African politics, international relations, IR theory and comparative politics.

Measuring International Authority - Liesbet Hooghe 2017-08-24

This is the third of five ambitious volumes theorizing the structure of governance above and below the central state. This book is written for those interested in the character, causes, and consequences of governance within the state. This book sets out a measure of authority for seventy-six international organizations (IOs) from 1950, or the time of their establishment, to 2010 which can allow researchers to test expectations about the character, sources, and consequences of international governance. The international organizations considered are regional (e.g. the EU, Andean Community, NAFTA), cross-regional (e.g. Commonwealth of Nations, the Organization of Islamic Cooperation), and global (e.g. the UN, World Bank, WTO). Firstly, the book introduces carefully constructed estimates for the scope and depth of authority exercised by international governments. The estimates are unique in their comparative scope, their specificity, and time span. Secondly, it describes describe broad trends in IO authority by comparing delegation and pooling, over time, across IOs, and across decision areas. Thirdly, it presents the evidence gathered by the authors to estimate international authority by carefully discussing forty-seven international organizations, and showing how their bodies are composed, what decisions each body makes, and how they make decisions. Transformations in Governance is a major new academic book series from Oxford University Press. It is designed to accommodate the impressive growth of research in comparative politics, international relations, public policy, federalism, environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions, down to subnational governments, and side-ways to public-private networks. It brings together work that significantly advances our understanding of the organization, causes, and consequences of multilevel and complex governance. The series is selective, containing annually a small number of books of exceptionally high quality by leading and emerging scholars. The series targets mainly single-authored or co-authored work, but it is pluralistic in terms of disciplinary specialization, research design, method, and geographical scope. Case studies as well as comparative studies, historical as well as contemporary studies, and studies with a national, regional, or international focus are all central to its aims. Authors use qualitative, quantitative, formal modeling, or mixed methods. A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style. The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina, Chapel Hill, and Walter Mattli of the University of Oxford.

Great Power Strategies - The United States, China and Japan
Quansheng Zhao 2022-09-05

This book provides a comparative study of the strategies of great powers in the Asia-Pacific, namely, the United States, China and Japan, known as

the Pacific Three. It examines the evolution of each power's strategic thinking and analyzes the three powers' respective foreign policies and internal debates in the policymaking process. It analyzes the three countries' conflict and cooperation from past to the present. It stresses the importance of the interactions between internal and external factors in the policymaking process, and emphasizes the great significance of these interactions for international relations theory. For example, it highlights the role of strategic advisers in think tanks and government agencies in the United States, Japan's informal and balanced policymaking process, and the impact of traditional culture in China, especially Confucianism, and the part played by Chinese think tanks.

William A. Graham is an influential and pioneering scholar of Islamic Studies at Harvard University. This volume brings together 17 contributions to the study of the Qur'an and Islam, all influenced by his work Contributions to this collection, by his colleagues and students, treat many different aspects of Islamic scripture, from textual interpretation and hermeneutics to recitation and parallels with the Bible. Other chapters tackle in diverse ways the question of what it means to be "Islamic" and how such an identity may be constituted and maintained in history, thought, and learning. A final section reflects on the career of William Graham and the relation of scholarship to the undervalued tasks of academic administration, especially where the study of religion is concerned. This book will be of interest to readers of Islamic Studies, Qur'anic Studies, Islamic history, Religious Studies, scripture, exegesis, and history of the book. Reclaiming Africa - Sam Moyo 2018-09-03

This book presents the findings of research conducted by scholars and activists associated with the Agrarian South Network, based mainly in Africa, Asia and Latina America. The research articulates a Southern perspective on the "new scramble" for Africa, with a view to strengthen tri-continental solidarities. The book explains the significance of the new

scramble in terms of the economic structures inherited from the late-nineteenth-century scramble and the subsequent post-independence period. The renewed competition for Africa's land and natural resources and the resumption of economic growth at the turn of the millennium have revived concerns regarding the continent's position in the world economy and the prospects for its development in the twenty-first century. In this regard, the book addresses two related issues: the character of the expansion of Southern competitors in relation to the more established Western strategies; and the impact of the renewed influx of investments in land, minerals, and associated infrastructure. The findings are presented with empirical rigor and conceptual clarity, to enable the reader to grasp what really is at stake in the twenty-first century - an epic struggle to reclaim Africa from the monopolies that exercise control over its land, minerals, labour, and destiny.

When Hens Begin To Crow - Sylvia Tamale 2018-10-26

Among African countries, Uganda is unique in its affirmative action program for women. In the late 1980s, President Yoweri Museveni announced his belief that Uganda's successful development depended on increased gender equity and backed his opinions by setting several women-centered policies in motion, including a 1989 rule that at least 39 seats in the Ugandan parliament be reserved for women. In this fascinating study, based on in-depth interviews with both male and female parliamentarians, women in nongovernmental organizations, and rural residents of Uganda, Sylvia Tamale explores how women's participation in Ugandan politics has unfolded and what the impact has been for gender equity. The book examines how women have adapted their legislative strategies for empowerment in light of Uganda's patriarchal history and social structure. The author also looks at the consequences and implications of women's parliamentary participation as a result of affirmative action handed down by the president, rather than pushed up from a grassroots movement. Although focusing on Uganda, Tamale's study is relevant to other African and non-African countries grappling with the twin challenges of democracy and development.
