**Intercultural Horizons Volume II** - Lavinia Bracci 2014-07-08

This volume features a collection of papers from the second annual Intercultural Horizons conference held in October 2012 in New York City (USA). The 2012 conference was the second in what is becoming an annual series of meetings, and the present volume therefore is a companion to one issued last year by Cambridge Scholars Publishing (*Intercultural Horizons: Best Practices in Intercultural Competence Development*, 2012). The papers included in this volume reflect a diversity of approaches both to intercultural education in the North American setting and to its application in service-learning and related contexts in diverse cultural settings in other nations. Our authors provide faculty and student perspectives, primarily from the level of postsecondary education but including a look as well at intercultural education at the primary level. Many of the papers focus in one way or another on issues of curriculum, teaching and learning in relation to developing intercultural competence in students in North American colleges and universities, particularly though not exclusively through the use of service-learning.

All of the papers touch in one way or another on another important development now affecting almost all institutions of higher education in North America and, increasingly, in other nations worldwide—that of the university's engagement with the community. During the past thirty years, such engagement has moved from the periphery to the core of many North American colleges and universities. Similar efforts are now emerging among many Asian universities and in Europe as well. The paper in this volume on the Polisocial initiative at the Politecnico di Milano in Italy is a good example of how the theme of university-community engagement is taking hold in a city and nation facing similar intercultural and economic challenges to those in North America—and serves as a preview of themes the International Center for Intercultural Exchange hopes to explore in its future conferences. *Clinical Guide to Alcohol Treatment* Robert J. Meyers 1995-08-04

This book is the first complete guide to implementing the Community Reinforcement Approach (CRA), an empirically based, highly effective cognitive-behavioral program for treating alcohol problems. CRA acknowledges the powerful role of environmental contingencies in encouraging or discouraging drinking, and attempts to rearrange these contingencies so that a non-drinking lifestyle is more rewarding than a drinking one. Unique in its breadth, the approach utilizes social, recreational, familial, and vocational strategies to aid clients in the recovery process. This authoritative manual is a hands-on guide to applying these therapeutic procedures. The authors present a step-by-step guide to each component of the treatment plan, many of which have been shown to be effective forms of treatment in themselves. Topics include behavioral skills training, social and recreational counseling, marital therapy, motivational enhancement, job counseling, and relapse prevention. Each chapter provides detailed instructions for conducting a procedure, describes what difficulties to expect, and presents strategies for overcoming them. Sample dialogues between clients and therapists, annotated by the authors, further illuminate the treatment process. The book concludes with a chapter that both addresses the common mistakes made when implementing CRA, and emphasizes the flexibility and benefits of this total treatment plan. This book is an invaluable resource for a wide range of

practitioners including psychologists, psychiatrists, substance abuse counselors, and social workers.

**Communication** - Eileen Scholes 1997

Employee commitment can mean the difference between success and disaster. So internal communication is now a key issue for senior management. This new Gower Handbook recognises IC's emergence as a new management discipline. It is aimed both at the generalist manager who needs to come to terms with the theoretical and technical aspects of internal communication, and the media specialist now seeking wider management skills and perspectives. Early chapters examine changes in IC's strategic context. These include organizations' increasing need for innovation and flexibility; the disappearance of 'loyalty' among employees; growing recognition of the importance of corporate 'brand' and how to sustain it; and the effects on traditional work and management patterns of new computer networks. Step-by-step guides introduce the reader to creating IC strategies and to carrying out research and measurement. Over 45 communication techniques, from team meetings to web sites, are evaluated for use in differing circumstances. The Handbook also looks at how to set about developing good communicators; and finally presents 16 practical case studies in key application areas. Organizations featured

are all leaders in their field, among them Andersen Consulting, The Body Shop, BP Chemicals, IBM, The Boots Company, Glaxo Operations, Rover, SmithKline Beecham, WH Smith and Unigate Dairies. **Pedigree** - Lauren A. Rivera 2016-03-22 How social class determines who lands the best jobs Americans are taught to believe that upward mobility is possible for anyone who is willing to work hard, regardless of their social status, yet it is often those from affluent backgrounds who land the best jobs. Pedigree takes readers behind the closed doors of top-tier

investment banks, consulting firms, and law firms to reveal the truth about who really gets hired for the nation's highest-paying entry-level jobs, who doesn't, and why. Drawing on scores of in-depth interviews as well as firsthand observation of hiring practices at some of America's most prestigious firms, Lauren Rivera shows how, at every step of the hiring process, the ways that employers define and evaluate merit are strongly skewed to favor job applicants from economically privileged backgrounds. She reveals how decision makers draw from ideas about talent—what it is, what best signals it, and who does (and does not) have it—that are deeply rooted in social class. Displaying the "right stuff" that elite employers are looking for entails considerable amounts of economic, social, and cultural resources on the part of the applicants and their parents. Challenging our most cherished beliefs about college as a great equalizer and the job market as a level playing field, Pedigree exposes the class biases built into American notions about the best and the brightest, and shows how social status plays a significant role in determining who reaches the top of the economic ladder.

Effective Presentation Skills - Robert Dilts 1994

The demands of the "Information Age" make it increasingly necessary and likely that we will need to make presentations as part of our normal activities. Making an effective presentation requires the ability to communicate and relate to other people. These are very basic skills, yet they are not usually taught to us as part of our traditional classroom education or professional training. The purpose of this book is to provide some of the key practical communication and relational skills necessary to make effective presentations. the focus is on people who make presentations for professional reasons. In particular, it focuses on presentations for teaching and training purposes, i.e., those related to organizational learning. In addition to professional trainers and teachers, it includes managers, consultants and

others who need to share knowledge and information. The book covers three general areas involved in making effective presentations in a learning context including (1) basic principles for forming an effective communication strategy, (2) designing and planning effective presentations and presentation materials and (3) managing issues related to motivation and interactions with a group or audience.
