Trends and Challenges in Digital Business Innovation Vincenzo Morabito 2014-02-04

This book describes the trends in digital innovation that are of most importance for businesses and explores the key challenges. The book is in three parts, the first of which focuses on developments in digital systems. Here, the ever-growing relevance of big data, cloud computing, and mobile services for business is discussed, and detailed consideration is given to the importance of social listening for understanding user behavior and needs and the implications of IT consumerization. In the second part, trends in digital management are examined, with chapters devoted to work practice, digital business identity as well as branding and governance. The final part of the book presents and reviews case studies of digital innovation at the global level that provide a benchmark of best practices, with inclusion of instructive fact sheets. While the book offers academic coverage of the digital transformation of business organizations and the associated challenges, it also describes concrete, real-world issues in clear, easy-to-understand language and will serve as a toolbox for managers that can be readily consulted. The text is supported by informative illustrations and tables, and practitioners will also benefit from the reported case studies and highlighted insights and

recommendations.

Comparative Education - Nicholas Adolf Hans 2011-12-08

This book is divided into four parts. In Part One the author considers the natural factors which have influenced the various national systems of education. They comprise racial, linguistic, geographical and economic factors. In Part Two he considers the contribution of religious traditions to education, more particularly those of the Catholic and Puritan faiths, and in Part Three the secular traditions of humanism, socialism and nationalism. Finally in Part Four a comparison is made of the systems of education in England and Wales, the USA, France and the Soviet Union.

Water-based Paint Formulations Ernest W. Flick 1975

This collection of 232 up-to-date water-based trade and industrial formulations will be of value to technical and managerial personnel in paint manufacturing companies and firms which supply raw materials or services to these companies, and to those interested in less hazardous, environmentally safer formulations. The book will be useful to both those with extensive experience as well as those new to the field. This book includes new and different formulations than those included in the previous volumes. The data consists of selections of manufacturers' suggested formulations made at no cost to, nor influence from, the makers or distributors of these materials. The information given is presented as supplied; the manufacturer should be contacted if there are any questions. Only the most recent data supplied us has been included. Any solvent contained is minimal. The table of contents is organized in such a way as to serve as a subject index. The formulations described are divided into sections which cover exterior, interior, and exterior and/or interior water-based paints, enamels, and coatings, as indicated below. Included in the descriptive information for each formulations, where available, the following properties may be listed: viscosity, solids, content, % nonvolatiles, pigment volume concentration, density, pH, spatter, leveling, sag resistance, scrub stability, freeze-thaw stability,

ease of application, gloss foaming, cratering, brightness, opacity, water spotting, adhesion to chalk, brush clean-up, reflectance, and sheen.

Volta a les Dolomites i als Alps italians. Les rutes del Giro - Rafael Vallbona. Llibre de ruta a cura de Llorenç Pros 2006

Les enormes masses calcàries de les Dolomites, que emergeixen de sobte enmig del bosc, no solament són una serralada d'un perfil geogràfic, paisatgístic i geològic enormement atractiu, sinó que són completament diferents de la tipologia de muntanyes que estem acostumats a veure als Pirineus i, fins i tot, als mitificats Alps, massís del Mont Blanc inclòs. Només això ja és un atractiu per anar-hi; però n'hi ha més. Sella, Gardena, Marmolada o Pordoi són referents mítics per als amants del ciclisme perquè formen part de la història de les 88 edicions del Giro d'Itàlia, una de les curses per etapes més importants del món amb el Tour de França i la Vuelta a Espanya. Noms que formen part de la història del ciclisme com Galletti, Binda, Coppi, Bartali, Anquetil, Merckx, Pantani, Bugno, Hinault o Indurain han guanyat a la meta final de Milà i s'han vestit amb la maglia rosa.

Pal Mònt - I personaggi Fulvio Bassutti 2020-12-30

È la continuazione del mio primo libro, "Pal Mònt", in friulano lavorare in tutto il Mondo, dove descrivevo l'avventuroso percorso d'imprenditore agli inizi della mia attività. Nella seconda biografia proseguo il racconto che si fermava al 1990. Come il primo anche questo non è un manuale di noiosa tecnica costruttiva ma un libro divertente sui fatti e personaggi, più o meno importanti, che hanno collaborato con me o che ho incontrato in quei periodi di attività. Tutti gli episodi descritti sono realmente accaduti, non ci sono più i cantieri in Africa ed America ma siamo in Italia, in Europa, nel mio Friuli e nel sud est asiatico, dove ho vissuto per oltre vent'anni. Ho sempre desiderato raccontare la mia singolare vita imprenditoriale, iniziata per caso e senza un soldo e non ancora esaurita. Due anni fa fui costretto a letto per una breve malattia il che mi ha dato l'opportunità di scrivere il primo "Pal Mònt", questo è il seguito che ho steso durante la quarantena forzata del corona virus. In entrambi si coglie la voglia di fare e di proporsi, senza mai fermarsi ed arrendersi, un insegnamento alle nuove generazioni. L'immagine che scaturisce è quella

di una persona più ponderata rispetto al primo periodo, con i piedi per terra, innamorato del lavoro ma anche della vita, ora c'è più esperienza e meno avventura giovanile, meno frenesia e più spazio anche ai momenti di pausa. È una biografia che si legge tutta d'un fiato, che fotografa lo spirito dell'autore, ma le peculiarità sono i personaggi descritti, che abbracciano un'ampia area geografica.

Rifacimento prospetti di edifici condominiali - Problematice progettuali ed esecutive con giurispresenza Salvatore Lombardo

2021-05-13T00:00:00+02:00

Il testo affronta le diverse problematiche e soluzioni che si possono presentare al tecnico nel rifacimento del prospetto di un edificio esistente, in particolare condominiale, con struttura portante intelaiata in c.a. e in muratura portante. Vengono trattati gli aspetti di ripristino strutturale e rifacimento intonaci, le cause di degrado dell'umidità da risalita capillare, nonché gli errori esecutivi negli interventi di emergenza in caso di cornicioni e balconi aggettanti pericolanti per fenomeni di spalling del calcestruzzo dovuto alla corrosione delle armature. È stata data la giusta rilevanza al contratto d'appalto, spesso sottovalutato, negli interventi di manutenzione straordinaria, ricordando che nella sua stesura non è consigliato fare riferimenti a norme riguardanti i lavori pubblici poiché costituiscono un caso a parte disciplinato da norme specifiche. Il testo è completato con la trattazione dei vizi e le difformità delle opere realizzate, nel caso specifico vizi e difetti nell'esecuzione degli intonaci come microcavillature inaccettabili dal punto di vista estetico o distacchi di porzioni di intonaco, il cui rifacimento, costituendo un rappezzo, darà adito ad altre contestazioni poiché sarà sempre visibile.

[La sala delle Cariatidi nel Palazzo Reale di Milano](#) - AA. VV.

2015-09-28T00:00:00+02:00

La neoclassica Sala delle Cariatidi del Palazzo Reale di Milano, realizzata fra il 1774 e il 1778 da Giuseppe Piermarini, Giocondo Arboretti e dagli scultori Gaetano Callani e Giuseppe Franchi, fu gravemente danneggiata nel bombardamento del 1943 e, negli anni successivi, dal parziale stato di abbandono e da un uso non adeguato alla sua conservazione. Il Ministero per i Beni e le Attività Culturali nel 2003 ha avviato un cantiere di studio e ricerca finalizzato a realizzare un necessario intervento di conservazione e di restauro delle pareti decorate, di recente concluso. Il volume raccoglie i risultati degli studi e delle ricerche svolte per completare la conoscenza della Sala sotto i diversi profili: storicoarchitettonico, storico-conservativo e tecnico. Un rilevante

apparato documentario dà corpo alle scelte progettuali effettuate e illustra tutti gli aspetti tecnico esecutivi dell'intervento svolto.

Flooring - José Moro 2016-06

Volume 1 of the publication should aid in the construction and the design of flooring and screeds. In addition to a fundamental theoretical basis, it offers decision-making tips and background information on various types of flooring and materials as well as how to plan proper structural connections and transitions.

10th International Conference on FRP Composites in Civil Engineering - Alper Ilki 2021-11-26

This volume highlights the latest advances, innovations, and applications in the field of FRP composites and structures, as presented by leading international researchers and engineers at the 10th International Conference on Fibre-Reinforced Polymer (FRP) Composites in Civil Engineering (CICE), held in Istanbul, Turkey on December 8-10, 2021. It covers a diverse range of topics such as All FRP structures; Bond and interfacial stresses; Concrete-filled FRP tubular members; Concrete structures reinforced or pre-stressed with FRP; Confinement; Design issues/guidelines; Durability and long-term performance; Fire, impact and blast loading; FRP as internal reinforcement; Hybrid structures of FRP and other materials; Materials and products; Seismic retrofit of structures; Strengthening of concrete, steel, masonry and timber structures; and Testing. The contributions, which were selected by means of a rigorous international peer-review process, present a wealth of exciting ideas that will open novel research directions and foster multidisciplinary collaboration among different specialists.

R&D, Innovation and Competitiveness in the European Chemical Industry - Fabrizio Cesaroni 2004-05-31

R&D, Innovation and Competitiveness in the European Chemical Industry explores the science & technology base and the dynamic performance of the European "system of innovation" in the chemical industry, with particular attention to its contribution to economic growth through innovation and competitiveness, and its ability to translate its research into commercially useful products. It also analyses the forces

that encourage the diffusion of chemical innovations on downstream user industries and among large and small firms. The studies presented in this book represent an analysis of the issues and questions raised by the Green Paper on Innovation presented by the European Commission, for the specific case of the European chemical industry. R&D, Innovation and Competitiveness in the European Chemical Industry will be of interest to industry and government experts related to the chemical industry, scholars; both faculty and graduate students interested in growth, corporate strategy and the management of innovation.

Abitare 2007

Eames House Conservation Project Laura Matarese 2019-04-15

In this multi-author volume, six chapters cover the investigations undertaken by the Getty Conservation Institute (GCI) and its consultants between 2011 and 2016 at the Eames House. Including analysis of paint stratigraphies, pigments, and organic binders; in situ paint investigation of the exterior steelwork of the house and studio; wood panel investigation and conservation treatment; environmental assessment; geotechnical evaluation; and a landscape survey and assessment, this publication supplies technical guidance for immediate conservation needs and long-term maintenance of the house. Numerous testing and investigation techniques were used, demonstrating the wide range of approaches to conservation that are available to others charged with maintaining a building from the modern era. A preface and introduction set the investigations in context of the overall goals of the Eames House Conservation Project and the Conserving Modern Architecture Initiative (CMAI). The GCI began working with the Charles and Ray Eames House Preservation Foundation (Eames Foundation) on the Eames House Conservation Project in 2011, which was catalyzed by the removal of the house's living room furniture for an exhibit at the Los Angeles County Museum of Art (LACMA). This provided a unique opportunity to address the wear and tear on the house and was the first field project under the CMAI, which seeks to advance the practice of conserving twentieth-century heritage.

Deadhouse Gates - Steven Erikson 2006-02-07

The second novel in the awe-inspiring Malazan Book of the Fallen series.

"Gripping, fast-moving, delightfully dark, with a masterful and unapologetic brutality reminiscent of George R. R. Martin." -- Elizabeth Haydon In the vast dominion of Seven Cities, in the Holy Desert Raraku, the seer Sha'ik and her followers prepare for the long-prophesied uprising known as the Whirlwind. Unprecedented in size and savagery, this maelstrom of fanaticism and bloodlust will embroil the Malazan Empire in one of the bloodiest conflicts it has ever known, shaping destinies and giving birth to legends . . . Set in a brilliantly realized world ravaged by dark, uncontrollable magic, *Deadhouse Gates* is a novel of war, intrigue and betrayal confirms Steven Erikson as a storyteller of breathtaking skill, imagination and originality--a new master of epic fantasy. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
