Organization Structures: Theory and Design, Analysis and Prescription describes how to organize people to achieve a desired outcome. This is accomplished by establishing sets of rules from "real world" organization contexts. Moreover, the development of these rules within "real world" contexts means that the rules must be true, general, operational, technically sound, and easy to use. With an understanding of rules and the processes of their use, organization structures can be identified, which in turn form the basis of a theoretical framework. This book discusses, examines, and demonstrates the interrelationship of the design rules, their theoretical use within these organization structures, along with their practical implications. Throughout the book, an extended example of the Masters Brewing Corporation (MBC) is used to illustrate the conceptual material and to make the implications of the organizational analysis explicitly concrete.

Between Enterprise and Ethics - John Hendry 2004-03-04

We live in a 'bimoral' society, in which people govern their lives by two contrasting sets of principles. On the one hand there are the principles associated with traditional morality. Although these allow a modicum of self-interest, their emphasis is on our duties and obligations to others: to treat people honestly and with respect, to treat them fairly and without prejudice, to help and care for them when needed, and ultimately, to put their needs above our own. On the other hand there are the principles associated with the entrepreneurial self-interest. These also impose obligations, but of a much more limited kind. Their emphasis is competitive rather than cooperative: to advance our own interests rather than to meet the needs of others. Both sets of principles have always been present in society but in recent years traditional moral authorities have lost much of their force and the morality of self-interest has acquired a much greater social legitimacy, over a much wider field of behaviour, than ever before. The result of this is that in many situations it is no longer at all apparent which set of principles should take precedence. In this book John Hendry traces the cultural and historical origins of the 'bimoral' society and explores the challenges it poses for the world of business and management. The developments that have led to the 'bimoral' society have also led to new, more flexible forms of organizing, which have released people's entrepreneurial energies and significantly enhanced the creative capacities of business. Working within these organizations, however, is fraught with moral tensions as obligations and self-interest conflict and managers are pulled in all sorts of different directions. Managing them successfully poses major new challenges of leadership, and 'moral' management, as the technical problem-solving that previously characterised managerial work is increasingly accomplished by technology and market mechanisms. The key role of management becomes the political and moral one of determining purposes and priorities, reconciling divergent interests, and nurturing trust in interpersonal relationships. Exploring these tensions and challenges, Hendry identifies new issues for contemporary management and puts recognized issues into context. He also explores the challenges posed for a post-traditional society as it seeks to regulate and govern an increasingly powerful and global business sector.

Encyclopedia of Management Theory - Eric H. Kessler 2013-03-01

In discussing a management topic, scholars, educators, practitioners, and the media often toss out the name of a theorist (Taylor, Simon, Weber) or make a sideways reference to a particular theory (bureaucracy, total quality management, groupthink) and move on, as if assuming their audience possesses the necessary background to appreciate and integrate the reference. This is often far from the case. Individuals are frequently forced to seek out a hodgepodge of sources varying in quality and presentation to provide an overview of a particular idea. This work is designed to serve as a core reference for anyone interested in the essentials of contemporary management theory. Drawing together a team of international scholars, it examines the global landscape of the key theories and the theorists behind them, presenting them in the context needed to understand their strengths and weaknesses to thoughtfully apply them. In

addition to interpretations of long-established theories, it also offers essays on cutting-edge research as one might find in a handbook. And, like an unabridged dictionary, it provides concise, to-the-point definitions of key concepts, ideas, schools, and figures. Features and Benefits: Two volumes containing over 280 signed entries provide users with the most authoritative and thorough reference resources available on management theory, both in terms of breadth and depth of coverage. Standardized presentation format, organized into categories based on validity and importance, structures entries so that readers can assess the fundamentals, evolution, and impact of theories. To ease navigation between and among related entries, a Reader's Guide groups entries thematically and each entry is followed by Cross-References. In the electronic version, the Reader's Guide combines with the Cross-References and a detailed Index to provide robust search-and-browse capabilities. An appendix with a Chronology of Management Theory allows readers to easily chart directions and trends in thought and theory from early times to the present. An appendix with Central Management Insights allows readers to easily understand, compare, and apply major theoretical messages of the field. Suggestions for Further Reading at the end of each entry guide readers to sources for more detailed research and discussion. Key themes include: Nature of Management Managing People, Personality, and Perception Managing Motivation Managing Interactions Managing Groups Managing Organizations Managing Environments Strategic Management Human Resources Management International Management and Diversity Managerial Decision Making, Ethics, and Creativity Management Education, Research, and Consulting Management of Operations, Quality, and Information Systems Management of Entrepreneurship Management of Learning and Change Management of Technology and
