MGMT A SOUTH ASIAN PERSPECTIVE WITH COURSEMATE. - CHUCK.
TRIPATHY WILLIAMS (MANAS RANJAN.) 2016

Internal Marketing - David M. Brown 2020-10-30

This book traces the development of internal marketing from initial conceptualisation through to the current issues. It identifies both significant underlying tensions between major theorists and areas in which new perspectives may enrich our understanding of this crucial subject. Internal marketing is the use of traditional strategies by organisations to market themselves to their employees. Presented in bite-sized sections, each of which dissects the most important themes and concepts underpinning the subject, this book explains how subsidiary areas of study have emerged and suggests how the introduction of concepts and perspectives from channel management literature can help analyse the dyadic encounters in which internal marketing takes place. Brown critically extends the scope of internal marketing theory yet further by presenting and analysing new interview transcripts to suggest that internal demarketing - an organisation making itself less attractive to its employees - may sometimes be undertaken intentionally. Internationally applicable and highly accessible, Internal Marketing is perfect for students, teachers, and researchers with an interest not only in internal marketing, but also in employer relations, internal branding, employer branding, and internal communications. It uses clear language and gradually introduces the reader to more sophisticated theoretical concepts step by step, with a uniquely focused, critical, and comprehensive thematic coverage of internal marketing and its extensive theoretical outputs.

Marketing and the Customer Value Chain - Thomas Fotiadis 2022-03-01

Marketing and supply chain management have a symbiotic relationship within any enterprise, and together they are vital for a company's viability and success. This book offers a systemic approach to the integration of marketing and supply chain management. It examines the strategic connections and disconnections between supply chain and operations management and marketing by focusing on the factors that constitute the extended marketing mix, including product, price, promotion, people, and processes. Key aspects of supply chain management are discussed in detail, including material handling, unit load, handling systems, and equipment, as well as warehousing and transportation, design, and packaging. The book then goes on to explore the marketing functions of intangible products (services), followed by a focus on B2B markets. Throughout, there is a strong emphasis on the optimization and maximization of the value chain through the development of a systems approach with a market-orientation. Pedagogy that translates theory to practice is embedded throughout, including theoretical mini-cases, chapter-by-chapter objectives, and summaries. Marketing and the Customer Value Chain will help advanced undergraduate and postgraduate students appreciate how front-end marketing can interface with the back-end operations of supply chain management.

Laws of UX - Jon Yablonski 2020-04-21

An understanding of psychology—specifically the psychology behind how users behave and interact with digital interfaces—is perhaps the single most valuable nondesign skill a designer can have. The most elegant design can fail if it forces users to conform to the design rather than working within the "blueprint" of how humans perceive and process the world around them. This practical guide explains how you can apply key principles in psychology to build products and experiences that are more intuitive and human-centered. Author Jon Yablonski deconstructs familiar apps and experiences to provide clear examples of how UX designers can build experiences that adapt to how users perceive and process digital interfaces. You'll learn: How aesthetically pleasing design creates positive responses The principles from psychology most useful for designers How these psychology principles relate to UX heuristics Predictive models including Fitts's law, Jakob's law, and Hick's law Ethical implications of using psychology in design A framework for applying these principles

Marketing Metrics - Paul W. Farris 2006-04-18

Few marketers recognize the extraordinary range of metrics now available for evaluating their strategies and tactics. In Marketing Metrics, four leading researchers and consultants systematically introduce today's most powerful marketing metrics. The authors show how to use a "dashboard" of metrics to view market dynamics from various perspectives, maximize accuracy, and "triangulate" to optimal solutions. Their comprehensive coverage includes measurements of promotional strategy, advertising, and distribution; customer perceptions; market share; competitors' power; margins and profits; products and portfolios; customer profitability; sales forces and channels; pricing strategies; and more. You'll learn how and when to apply each metric, and understand tradeoffs and nuances that are critical to using them successfully. The authors also demonstrate how to use marketing metrics as leading indicators, identifying crucial new opportunities and challenges. For clarity and simplicity all calculations can be performed by hand, or with basic spreadsheet techniques. In coming years, few marketers will rise to senior executive levels without deep fluency in marketing metrics. This book is the fastest, easiest way to gain that fluency.

Moral Wisdom - James F. Keenan 2010

At a time when religion and spirituality have been divorced from one another and morality and ethics are viewed as being confining rather than liberating, Fr. James Keenan has developed a new edition to his beloved book Moral Wisdom. There are new discussions of social sin and Pope Benedict XVI's encyclical Caritas in Veritate, a clearer exploration of Jesus in the New Testament, and new study questions at the end of each chapter. 'Moral wisdom,' as Fr. Keenan calls it, is the distinctive gift of the Catholic tradition, a gift that helps us discern what values to pursue and which virtues to embody on the path to becoming who we really are and who God calls us to be. Fr. Keenan uses a conversational style filled with stories and examples to open the treasure trove of resources in the Catholic tradition for developing moral wisdom. He lifts up the lessons on love, conscience, sin, and suffering, helping readers connect with the formative influences of the Catholic heritage and appreciate what gives meaning to our lives and what enhances our relationships with friends and family

Marketing Places - Philip Kotler 2002-01-15

Today's headlines report cities going bankrupt, states running large deficits, and nations stuck in high debt and stagnation. Philip Kotler, Donald Haider, and Irving Rein argue that thousands of "places" -- cities, states, and nations -- are in crisis, and can no longer rely on national industrial policies, such as federal matching funds, as a promise of jobs and protection. When trouble strikes, places resort to various palliatives such as chasing grants from state or federal sources, bidding for smokestack industries, or building convention centers and exotic attractions. The authors show instead that places must, like any market-driven business, become attractive "products" by improving their industrial base and communicating their special qualities more effectively to their target markets. From studies of cities and nations throughout the world, Kotler, Haider, and Rein offer a systematic analysis of why so many places have fallen on hard times, and make recommendations on what can be done to revitalize a place's economy. They show how "place wars" -- battles for Japanese factories, government projects, Olympic Games, baseball team franchises, convention business, and other economic prizes -- are often misguided and end in wasted money and effort. The hidden key to vigorous economic development, the authors argue, is strategic marketing of places by rebuilding infrastructure, creating a skilled labor force, stimulating local business entrepreneurship and expansion, developing strong public/private partnerships, identifying and attracting "place compatible" companies and industries, creating distinctive local attractions, building a service-friendly culture, and promoting these advantages effectively. Strategic marketing of places requires a deep understanding of how "place buyers" -- tourists, new residents, factories, corporate headquarters, investors -- make their place decisions. With this understanding, "place sellers" -- economic development agencies, tourist promotion agencies, mayor's offices -- can take the necessary steps to compete aggressively for place buyers. This straightforward guide for effectively marketing places will be the framework for economic development in the 1990s and beyond.
