Principles and Techniques of Psychiatric Nursing - Madelene Elliott Ingram 1955

Principles of Inpatient Psychiatry Fred Ovsiew 2008-11-01
Principles of Inpatient Psychiatry is geared to

psychiatrists working in inpatient settings: residents, psychiatrists who occasionally provide inpatient care, and psychiatric "hospitalists" who specialize in the inpatient arena. Inpatient settings contain the sickest psychiatric patients, such as those with a high risk of suicide, agitation requiring emergency management, or treatment-resistant psychosis and depression, all topics discussed in the book. Co-morbid general-

medical illness is common, and the book focuses attention, supported by case examples, on medical and neuropsychiatric as well as general-psychiatric evaluation and management. Chapters address special clinical problems, including first-episode psychosis, substance abuse, eating disorders, and legal issues on the inpatient service. The editors bring expertise to bear on a wide range of treatments, including psychopharmacologic, psychodynamic, and milieu approaches.

Principles and Practice of Psychiatric Rehabilitation, Second Edition - Patrick W. Corrigan
2016-05-06

The authoritative text on

psychiatric rehabilitation, this book covers everything from conceptual and empirical foundations to exemplary program models. Students and practitioners gain the knowledge needed to help adults with psychiatric disabilities move forward in their recovery process and build personally satisfying lives. The book presents tools and strategies for assessing personal needs and strengths, integrating medical and psychosocial interventions, and implementing supportive services in such areas as housing, employment, education, substance abuse, and physical health. Numerous case examples illustrate both the real-world challenges of serious mental illness and the difference that effective interventions can make. New to This Edition *Incorporates the latest concepts and evidence-based interventions. *Streamlined chapter organization: more concise, yet still comprehensive. *Heightened focus on empowerment, self-

determination, and wellness promotion. *New or expanded discussions of the "housing-first" model, harm reduction, peer services and support, and the Affordable Care Act.

Psychiatric Care of the Medical Patient - Barry S. Fogel

2015-05-28

The third edition of *Psychiatric Care of the Medical Patient* brings a classic reference text into the twenty-first century. It combines critical scholarship with the voice of expert clinicians who work at the interface of psychiatry with medical specialties. It is meant to be read for pleasure as well as consulted as a reference. The editors have worked with the authors to bring a consistent perspective to the book - one that sees the medical psychiatrist as an agent for bringing a more comprehensive perspective to medical care. Even seasoned and knowledgeable practitioners will find much that is new to them in this book. The volume covers topics in depth that other books in the field may not cover at all, such

as the use of herbal and nutritional therapies for medical-psychiatric symptoms and syndromes, and the choice of questionnaires to supplement history-taking. It looks at old topics in a new way: The chapter on the physical examination applies psychometric considerations to the Babinski sign, describes the method and application of quantitative bedside olfactory testing, and discusses smartphone apps to improve the sensitivity of the examination. *Psychiatric Care of the Medical Patient, 3rd Edition* provides concepts and information to facilitate the dialogue between psychiatrists and general medical specialists - minimizing psychiatric jargon and speaking in the common language of caring and curious physicians.

Psychiatric Nursing - Mary Ann Boyd 2008

The AJN Book of the Year award-winning textbook, *Psychiatric Nursing: Contemporary Practice*, is now in its thoroughly revised, updated Fourth Edition. Based

on the biopsychosocial model of psychiatric nursing, this text provides thorough coverage of mental health promotion, assessment, and interventions in adults, families, children, adolescents, and older adults. Features include psychoeducation checklists, therapeutic dialogues, NCLEX® notes, vignettes of famous people with mental disorders, and illustrations showing the interrelationship of the biologic, psychologic, and social domains of mental health and illness. This edition reintroduces the important chapter on sleep disorders and includes a new chapter on forensic psychiatry. A bound-in CD-ROM and companion Website offer numerous student and instructor resources, including Clinical Simulations and questions about movies involving mental disorders.

Principles and Practice of Psychiatric Rehabilitation -

Patrick W. Corrigan

2012-08-22

This comprehensive, authoritative text provides a state-of-the-art review of current knowledge and best practices for helping adults with psychiatric disabilities move forward in their recovery process. The authors draw on extensive research and clinical expertise to accessibly describe the “whats,” “whys,” and “how-tos” of psychiatric rehabilitation. Coverage includes tools and strategies for assessing clients’ needs and strengths, integrating medical and psychosocial interventions, and implementing supportive services in such areas as

housing, employment, social networks, education, and physical health. Detailed case examples in every chapter illustrate both the real-world challenges of severe mental illness and the nuts and bolts of effective interventions.

Stuart and Sundeen's Mental Health Nursing -

Sally Hardy 1997

Based on Stuart & Sundeen's Principles and Practice of Psychiatric Nursing, this UK edition is geared toward practice for nurses in the UK. The first unit covers the principles of mental health nursing care including roles and functions, models of care, the therapeutic relationship, and the context in which mental health nursing care is practiced in the UK. Unit Two looks at where mental health nursing care is provided: at home, in day centers, in hospital settings. With the move toward care in the community emphasis is given to the continuity of care and this unit will reflect the needs of UK practitioners. Unit Three then applies these principles to

practice and considers the nursing interventions for a range of mental health care needs of individuals due to a wide range of conditions. This unit also considers the main treatment interventions offered in the UK. Not available in the U.S

Psychiatric and Mental Health Nursing - Desmond Cormack
2013-11-11

Psychiatric and Mental Health Nursing: Theory and practice was conceived as a result of three major premises which, in the view of the editors, relate to the practice of psychiatric and mental health nursing. First, that high-quality psychiatric and mental health nursing can be practised only if it is underpinned by appropriate nursing theory. Secondly, that there exists a body of theory which can and should be applied to psychiatric and mental health nursing. Thirdly, that there is a need for a text which will assist teachers, students and clinicians to apply available nursing and borrowed theory to clinical practice. The general aim of this book is to introduce nursing students to a theory based approach to caring for people with psychiatric and mental health problems. The

phrase psychiatric and mental health problems indicates that the text relates to clients with a psychiatric diagnosis, and also to those who have mental health problems but who do not necessarily have such a diagnosis. The client group to which the material in this text applies will include those who are, or have been, hospitalized and those in the community who have not been, and may never be, hospitalized. The intended readership is all students of psychiatric and mental health nursing issues, for example basic and post-basic nurses, and their teachers.

Psychotherapy for the Advanced Practice Psychiatric Nurse - Kathleen Wheeler

Psychiatric-Mental Health Nursing - Jeffrey S Jones,
DNP, PMHCNS, BC, LNC
2012-03-16

This psychiatric-mental health undergraduate textbook, based on the theories of Hildegard Peplau and Joyce Travelbee, is the first recent book devoted to interpersonal relations as the foundation for therapeutic practice in psychiatric nursing. It guides the student through the essential phases of self-discovery necessary to integrate interpersonal nursing

theory into practice, and provides a historical overview of the profession. The book addresses the most current ISPN and APNA competencies and presents content designed to foster self-growth, and critical thinking and decision-making skills, as well as to implement therapeutic interventions. It offers an overview of theories of mental illness and a detailed discussion of commonly seen psychiatric disorders, and addresses mental health care settings across the lifespan and different populations. Clinical case studies and first-hand accounts vividly describe the realities of living with specific mental illnesses, "What would you do?" questions stimulate discussions, and sample and practice care plans for chronic mental illness facilitate integration of concepts into practice. Evidence-based practice summaries from psychiatric nursing and related research literature are included, and NANDA guidelines are integrated throughout. A new chapter

with DSM-V updates is also available. This affordably priced text additionally comes with supplementary materials for both teachers and students, including handy review guides, summaries, drug monographs, and hyperlinks to films and video illustrating content. Psychiatric Nursing Care Plans - E-Book - Katherine M. Fortinash 2006-05-16

The most comprehensive psychiatric nursing care planning text available assists students and practitioners in providing effective care in a variety of settings. Clear presentation of information, consistent use of the nursing process, correlation of nursing and medical diagnoses, and prioritization of interventions make this text an invaluable resource. Grounded in the

latest classification of the Diagnostic and Statistical Manual of Mental Disorders (DSM-IV-TR) and the most current list of NANDA-approved nursing diagnoses, this text covers a wide range of disorders, their psychopathology, and appropriate nursing interventions with rationales. Care plans use real clinical situations and include therapeutic and nontherapeutic dialogue examples to familiarize nurses with likely scenarios and equip them with the tools they need to feel confident in any clinical setting. The first chapter, The Nursing Process, effectively describes the central principles of psychiatric nursing practice in detailing the ANA's six-step nursing process along with additional information on therapeutic nurse-client communication skills, client history and assessment tools, NIC and NOC, and more. The six-step nursing process format is maintained throughout to emphasize a practice-oriented, problem-solving approach to

psychiatric care. Major psychiatric disorders are reviewed consistently and completely with sections including Etiology, Epidemiology, Assessment and Diagnostic Criteria, Interventions, and Prognosis and Discharge Criteria. With this basis of knowledge, relevant care plans are offered in the second section of each chapter. Care plans based on DSM-IV-TR medical and NANDA nursing diagnoses are logically and consistently organized with Assessment Data, Outcome Criteria, Planning and Implementation, and Evaluation sections. Assessment Data sections include detailed related factors (etiology) and defining characteristics or risk factors as appropriate for the specific diagnosis. Outcome Criteria sections give the reader clear indications of the desired end state. Planning and Implementation sections list specific, relevant, and practical nursing interventions with rationales in a clear, comprehensible two-column

format. UNIQUE! Therapeutic and non-therapeutic dialogue examples are presented throughout to promote more effective client communication. Evaluation sections state the role of outcome evaluation as a critical and ongoing step in the nursing process. Client and Family Teaching boxes include Nurse Needs to Know and Teach Client and Family sections covering all aspects of post-treatment instructions for clients and caregivers. DSM-IV-TR boxes list all related DSM-IV-TR diagnoses for quick reference. Helpful appendices contain information and strategies that are timely and useful in the care of clients with mental and emotional disorders including such topics as psychiatric and psychosocial therapies, grief and loss, spirituality, and many more.

European Psychiatric/Mental Health Nursing in the 21st Century - José Carlos Santos 2018-02-01

This groundbreaking first volume of the Series has a number of features that set it apart from other books on this subject: Firstly, it focuses on interpersonal, humanistic and ecological views and approaches to P/MH nursing. Secondly, it highlights patient/client-centered approaches and mental-health-

service user involvement.

Lastly, it is a genuinely European P/MH nursing textbook - the first of its kind - largely written by mental health scholars from Europe, although it also includes contributions from North America and Australia/New Zealand. Focusing on clinical/practical issues, theory and empirical findings, it adopts an evidence-based or evidence-informed approach. Each contribution presents the state-of-the-art of P/MH nursing in Europe so that it can be transferred to and implemented by P/MH nurses and the broader mental health care community around the globe. As such, it will be the first genuinely 21st century European Psychiatric Mental Health Nursing book.
