The Numerical Discourses of the Buddha 2012-11-13

Like the River Ganges flowing down from the Himalayas, the entire Buddhist tradition flows down to us from the teachings and deeds of the historical Buddha, who lived and taught in India during the fifth century B.C.E. To ensure that his legacy would survive the ravages of time, his direct disciples compiled records of the Buddha's teachings soon after his passing. In the Theravada Buddhist tradition, which prevails in Sri Lanka and Southeast Asia, these records are regarded as the definitive "word of the Buddha." Preserved in Pali, an ancient Indian language closely related to the language that the Buddha spoke, this full compilation of texts is known as the Pali Canon. At the heart of the Buddha's teaching were the suttas (Sanskrit sutras), his discourses and dialogues. If we want to find out what the Buddha himself actually said, these are the most ancient sources available to us. The suttas were compiled into collections called "Nikayas," of which there are four, each organized according to a different principle. The Digha Nikaya consists of longer discourses; the Majjhima Nikaya of middle-length discourses; the Samyutta Nikaya of thematically connected discourses; and the Anguttara Nikaya of numerically patterned discourses. The present volume, which continues Wisdom's famous Teachings of the Buddha series, contains a full translation of the Anguttara Nikaya. The Anguttara arranges the Buddha's discourses in accordance with a numerical

scheme intended to promote retention and easy comprehension. In an age when writing was still in its infancy, this proved to be the most effective way to ensure that the disciples could grasp and replicate the structure of a teaching.

PPP (public-private partnership) is a buzzword, especially in growing economies like India where it takes a partnership between the government and a private entity to establish successful infrastructural projects. However, PPPs in India face many hurdles that lead to either long delays or surprisingly, sometimes early completion of PPP projects, but with quality getting compromised. This book will take readers inside the world of PPPs and show how the legal, regulatory and political environments have facilitated or obstructed the speedy enforcement of plans for the creation of requisite infrastructure in India. With the help of various case studies, the book discusses the legal and regulatory issues in different sectors of infrastructure in India such as power, telecom, rail, air, road and sea. In addition to discussing challenges faced by them, the book emphasizes that a proper legal framework with effective regulations is necessary to monitor and regulate the creation and management of public goods. From funding to legal issues, Infrastructure, PPP and Law for Executives shows what it takes for the safe sailing for PPPs in India. Castes and Tribes of Southern India - Edgar Thurston 2020-07-26
 Castes and Tribes of Southern India is a seven-volume encyclopedia of social groups of Madras Presidency and the princely states of Travancore, Mysore, Coorg and Pudukkottai published by British museologist Edgar Thurston and K. Rangachari in 1909. The seven-volume work was one of several such publications resulting from the Ethnographic Survey of India project which was formally instituted by the Government of British India in 1901. The Survey was intended to record details of the manners, customs and physical features of Indian castes and tribes using in part the anthropometric methods that had first been used in India by Herbert Hope Risley for his survey of the tribes and castes of Bengal. Eight years of funding was allotted for the purpose. Edgar Thurston was the son of Charles Bosworth Thurston of Kew, London. Schooled at Eton College, he then studied medicine at King's College, London, qualifying as LRCP in 1877. He worked as a

medical officer in Kent County Lunatic Asylum and became a curator of the museum at King's College before joining the Madras Museum in 1885 as a superintendent. The British government in India appointed a Superintendent of Ethnography for each province. Thurston, who had been Superintendent of the Madras Government Museum since 1885, had already conducted some ethnographic work in his studies of the hill tribes of Nilgiris District, published in 1894, and elsewhere. He was appointed Superintendent for Madras Presidency, while L. K. Ananthakrishna Iyer and N. Subramania Iyer were respectively appointed Superintendents for the princely states of Cochin and Travancore. The reports for the two princely states were later integrated with Thurston's work to form the Castes and Tribes of Southern India, as were the results of Thurston's earlier researches into the hill tribes. [citation needed] The state of Mysore was allocated to Thurston for an anthropometric survey but excluded for the ethnographic survey. In his investigations in the Madras Presidency, Thurston was assisted by K. Rangachari of the Government Museum. Nature magazine, in its September 1910 issue, described the work as "a monumental record of the varied phases of south Indian tribal life, the traditions, manners and customs of people. Though in some respects it may be corrected or supplemented by future research it will long retain its value as an example of out-door investigation, and will remain a veritable mine of information, which will be of value."
