Effective corporate initiatives and processes are the bedrock of successful organizations; the "Developing Practice" series provides manager with essential frameworks to identify, formulate and implement the best policies and practice in the management and development of people How to manage human capital - Alex Cole 2013-04-09

Project Report from the year 2012 in the subject Business economics - Business Management, Corporate Governance, grade: A, The University of Liverpool, language: English, abstract: Recruitment and selection are the processes of human resource management that are applied in organization for fulfilling its human resource needs. In this report, recruitment and selection processes adopted in Sainsbury and Tesco have been discussed and compared. This report also discusses the importance of recruitment and selection for the organizations. Only secondary data has been included in the report for the evaluation of its aims and objectives. Through company reports and articles, recruitment and selection processes in both organizations have been discussed and compared. The findings of the report suggest that recruitment and selection in both organizations has been developed in terms of a structured activity. At Tesco, internal and external sources of recruitment are used for fulfilling existing posts in the organization. It relies on internal sources more than on external sources. Television, radio, newspapers and internet are preferred tools of recruitment by Tesco. It also allows candidates

to drop their resume in stores for further selection process. On the other hand, Sainsbury relies on internal and external recruitment tools, equally. Internally, existing employees are assessed for promotions on higher levels in the organization. Through external sources, Sainsbury attracts suitable employees from website and assessed the suitable candidates through several tests and interviews. By comparing the recruitment and selection strategies of both organizations, it is found that Tesco has adopted costly and time consuming strategies. Moreover, its store recruitment strategy does not ensure selection of suitable candidates. On the other hand, Sainsbury is cost effective in its strategies but these strategies can be time consuming. It is recommended that Tesco needs to rely adopt cost effective mechanisms for recruitment and selection. On the other hand, Sainsbury need to shorten its time of final selection.

Understanding Human Resource Management - Kamoche, Ken 2001-04-01

* An accessible introduction to the key debates in human resource management * A fresh critique of taken-for-granted assumptions underpinning HRM * A pointer to future directions in HRM Ken Kamoche critically examines contemporary issues in the management of people. He reviews some of the significant themes that have shaped HRM as it has emerged during the course of the last century. The book identifies the definitive role of the tension between the drive for organizational performance and the 'humanization' of work. It argues, however, that our understanding of both strands is inadequate and poorly researched, leading to an incomplete picture of the dynamics of managing people. Understanding Human Resource Management also examines the relevance of such contemporary debates as the resource-based view, appropriation and globalization, and explores how researchers and practitioners can now move towards a more viable conception of HRM. '...excellent coverage of the essential areas in human resource management today: contemporary human resource management, strategic HRM, and international HRM...a very readable and concise treatment...it is easy to highly recommend this book.' Professor Randall S. Schuler, Rutgers

University 'At last a genuinely original new book on HRM that deals with the concerns of the 21st rather than the last century. Ken Kamoche unpacks some fascinating ideas about appropriation, the "community concept" and facilitating resourcefulness. He is to be congratulated on a real tour de force. A book not to be missed by anyone taking a critical perspective on HRM.' Professor Karen Legge, University of Warwick

The issue of global talent management has become an important area for multinational enterprises and researchers for a number of reasons. First, there is a growing recognition of the key role played by globally competent managerial talent in the success of the MNE. Second, MNEs are facing severe problems in recruiting and retaining the necessary managerial talent for their global operations. Third, competition between employers has become more generic and has shifted from the country level to the regional and global levels.
